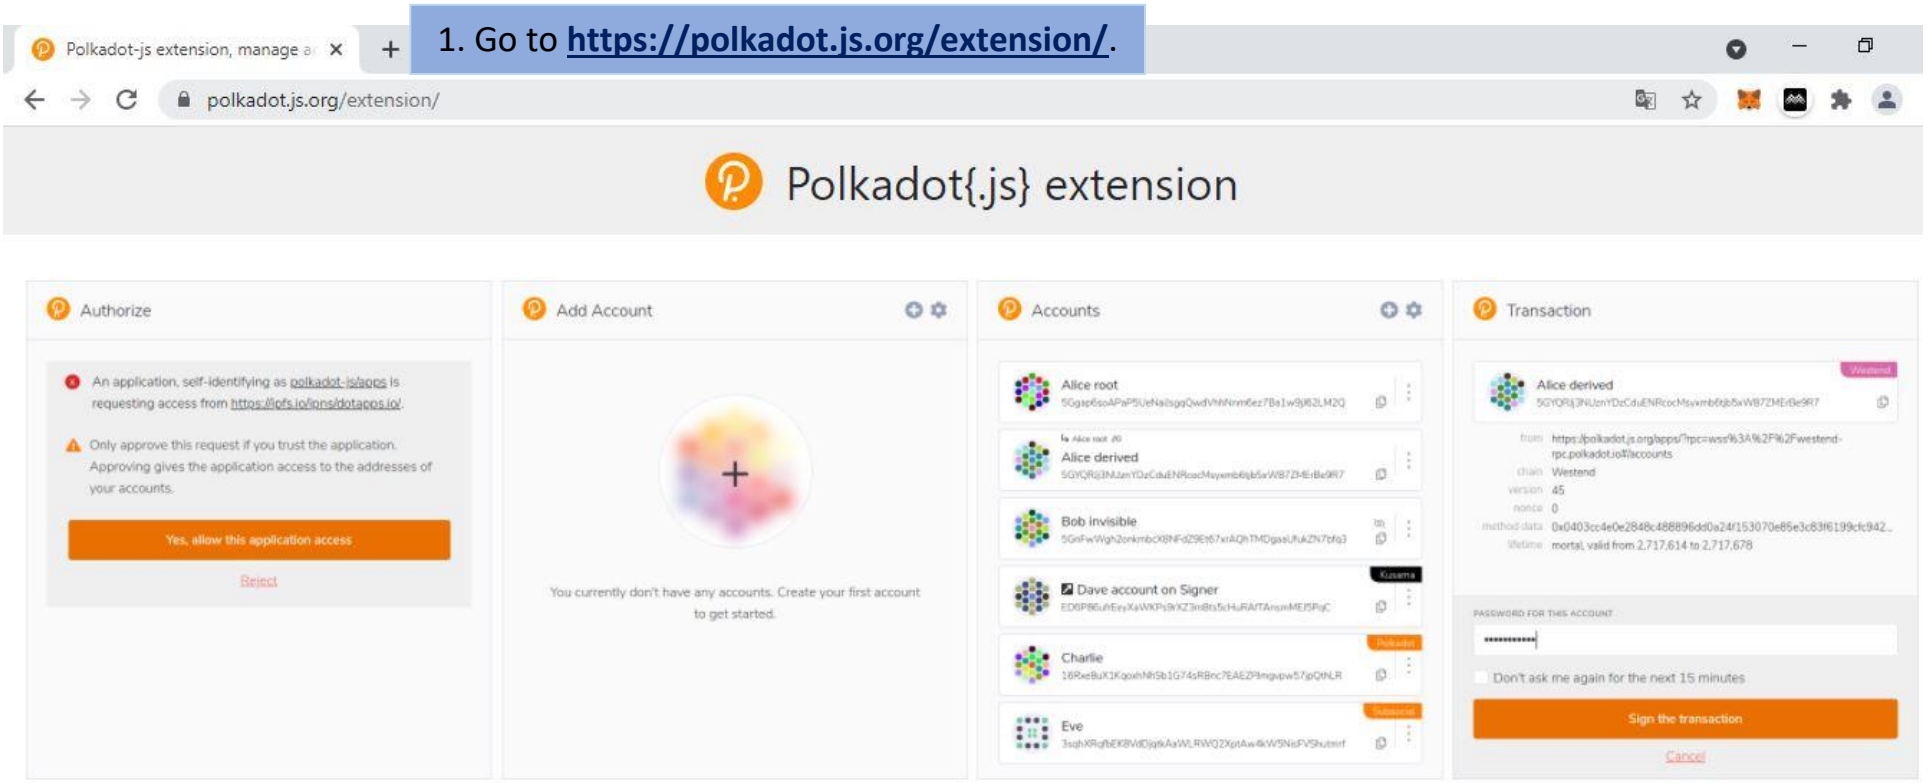
PART 0: Wallet setups

1. **Extension:** Download and install the browser extension.

a) Download the extension.



1. Go to **https://polkadot.js.org/extension/**.

This browser extension does one thing: it manages accounts and allows the signing of transactions with those accounts. It does not inject providers for use by dapps at this early point, nor does it perform wallet functions, e.g send funds.

2. Click **Download for Chrome**.

b) Install the extension.
