**Events**

**Extrinsics & Events in detail:**

An event is a piece of data **from within the blockchain** (ex: issue a reward payout from my validator).

An extrinsic is a piece of data **from the outside world** (ex: claim a reward payout for my stash).

**Overview of transactions/operations included in this block.**

Note: Click on the dropdown arrow to view each individual transaction/operation in greater detail.

## c) Monitor blockchain forks.

The screenshot shows the Polkadot.js interface with the Network tab selected. In the top left, it displays "Kusama" with account details "kusama/9070" and "#8,483,005". Below this, the "Forks" tab is active. On the left, there's a sidebar with "Explorer", "Chain info", "Block details", and "Forks". The main area shows a table of blocks. A red box labeled "2<sup>nd</sup> fork." highlights the first two rows, which are colored white. A green arrow points from the text "Last propagated block number and block hash (white colour)" to the first row. A red box labeled "1st fork." highlights the remaining rows, which are colored light green. A green arrow points from the text "Last finalised block number and block hash (green colour)" to the third row. The table data is as follows:

	blocks	forks
#8,483,005	0x90bc80922...	0x5026f59...
#8,482,989	0xc90b093ad...	0x486895b...
#8,482,988	0x486895bf0...	0xab5891b...
#8,482,985	0x46bebf794...	0x15391d2d6...
#8,482,984	0x8f1bb305b...	0xb6eca10d...
#8,482,969	0xc4acbb85a...	0xe094070...

**Key information on forks: number of blocks captured, and number of forks encountered since monitoring started.**

Last propagated block number and block hash (white colour) captured by this node since monitoring started.

Last finalised block number and block hash (green colour) captured by this node since monitoring started.

## d) Monitor blockchain nodes information.

Kusama  
kusama/9070

Nature of the transaction(s) in queue.

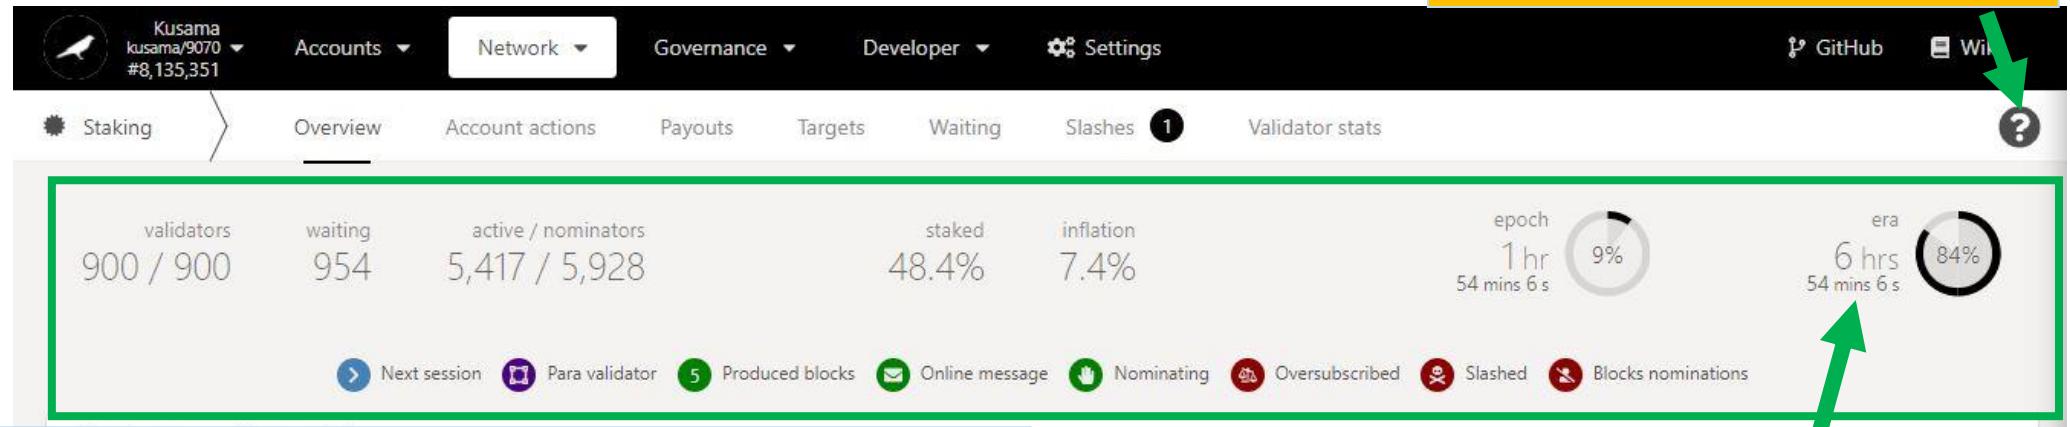

Sender(s) of the transaction(s) in queue.

## 2. Staking: Explore staking-related operations.

## a) View general staking information.

**Basic information on technical words**  
used in the STAKING section.

Key information on validators, nominators and staking statistics.

Countdown to the inclusion of new nominators into the list of rewardees.

The screenshot shows the Validators page. It lists five validators with their addresses and icons:

- CaKh7H...pLYTH4
- CaRYnY...Y2bnqc
- CaSTAS...ZMjZl2
- CagHkt...yGym8W
- CamaqN...tbPFD1

Below this list is a table showing validators' balances, commissions, and performance:

	other stake	own stake	commission	points	last #
	5,003.4452 KSM (16)	1.0000 KSM	100.00%	1,060	
	6,901.6296 KSM (3)	0.4500 KSM	10.00%	1,120	
	4,173.3305 KSM (55)	10.0000 KSM	100.00%	780	
	7,413.6884 KSM (1)	0.1000 KSM	100.00%	640	
	5,181.4473 KSM (18)	1.0000 KSM	5.00%	1,480	

Addresses of currently elected validators.

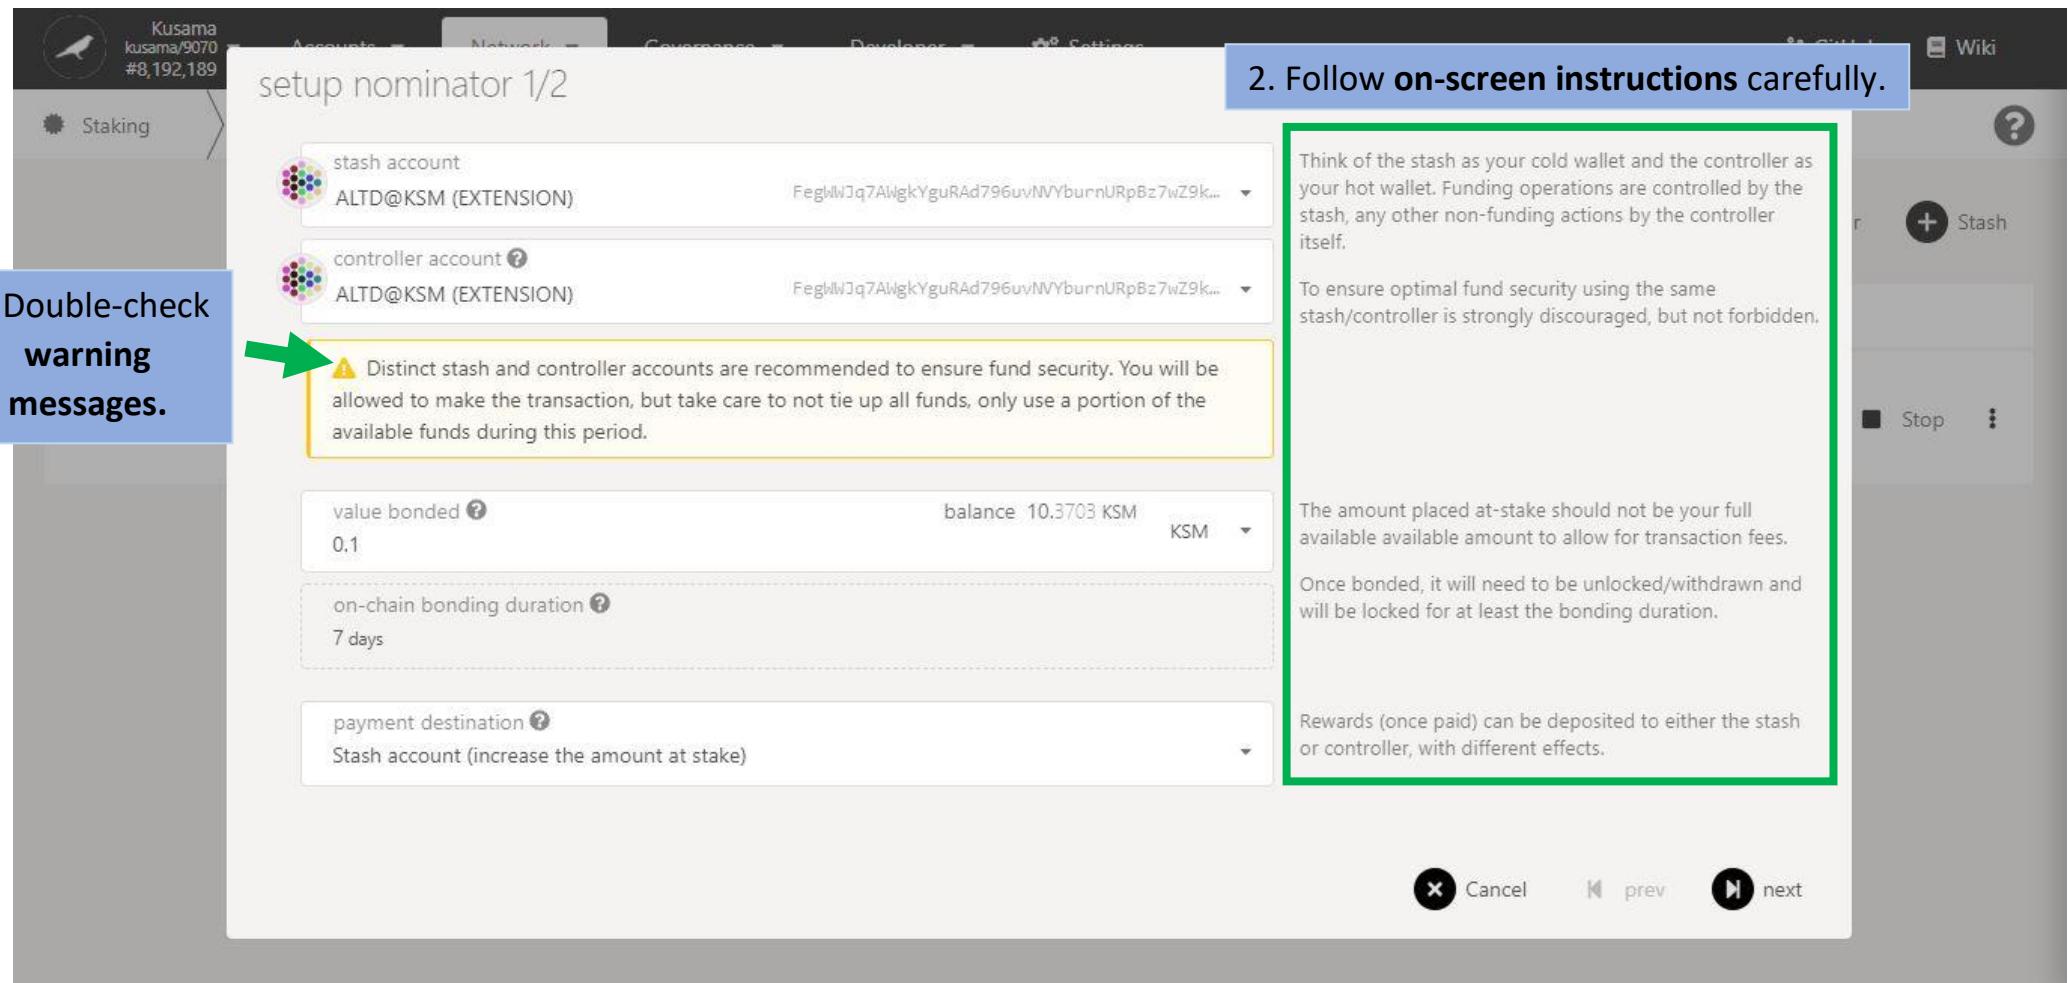

Summary of validators' balances, commissions, and performance.

**NEVER SEND YOUR KSM TO A VALIDATOR'S ADDRESS!**

b) Manage account nominations:

- Set nominators.

The screenshot shows the Polkadot-JS Staking interface. At the top, there is a navigation bar with tabs for Accounts, Network, Governance, Developer, and Settings. Below the navigation bar, there is a sub-navigation bar with tabs for Overview, Account actions (which is the active tab), Payouts, Targets, Waiting, Slashes (with a notification count of 1), and Validator stats. On the far right of this sub-navigation bar is a question mark icon. Below the sub-navigation bar, there is a filter section with four radio buttons: All stashes (selected, indicated by a checked checkbox), Nominators, Validators, and Inactive. To the right of these buttons are three buttons with plus signs: Nominator, Validator, and Stash. A green arrow points from the text "1. Click Nominator." to the Nominator button. A blue callout box contains the text "1. Click Nominator.". On the left side of the main content area, there is a section titled "stashes" with the sub-section "No funds staked yet. Bond funds to validate or nominate a validator".

**3. Double-check warning messages.**

**2. Follow on-screen instructions carefully.**

Distinct stash and controller accounts are recommended to ensure fund security. You will be allowed to make the transaction, but take care to not tie up all funds, only use a portion of the available funds during this period.

Think of the stash as your cold wallet and the controller as your hot wallet. Funding operations are controlled by the stash, any other non-funding actions by the controller itself.

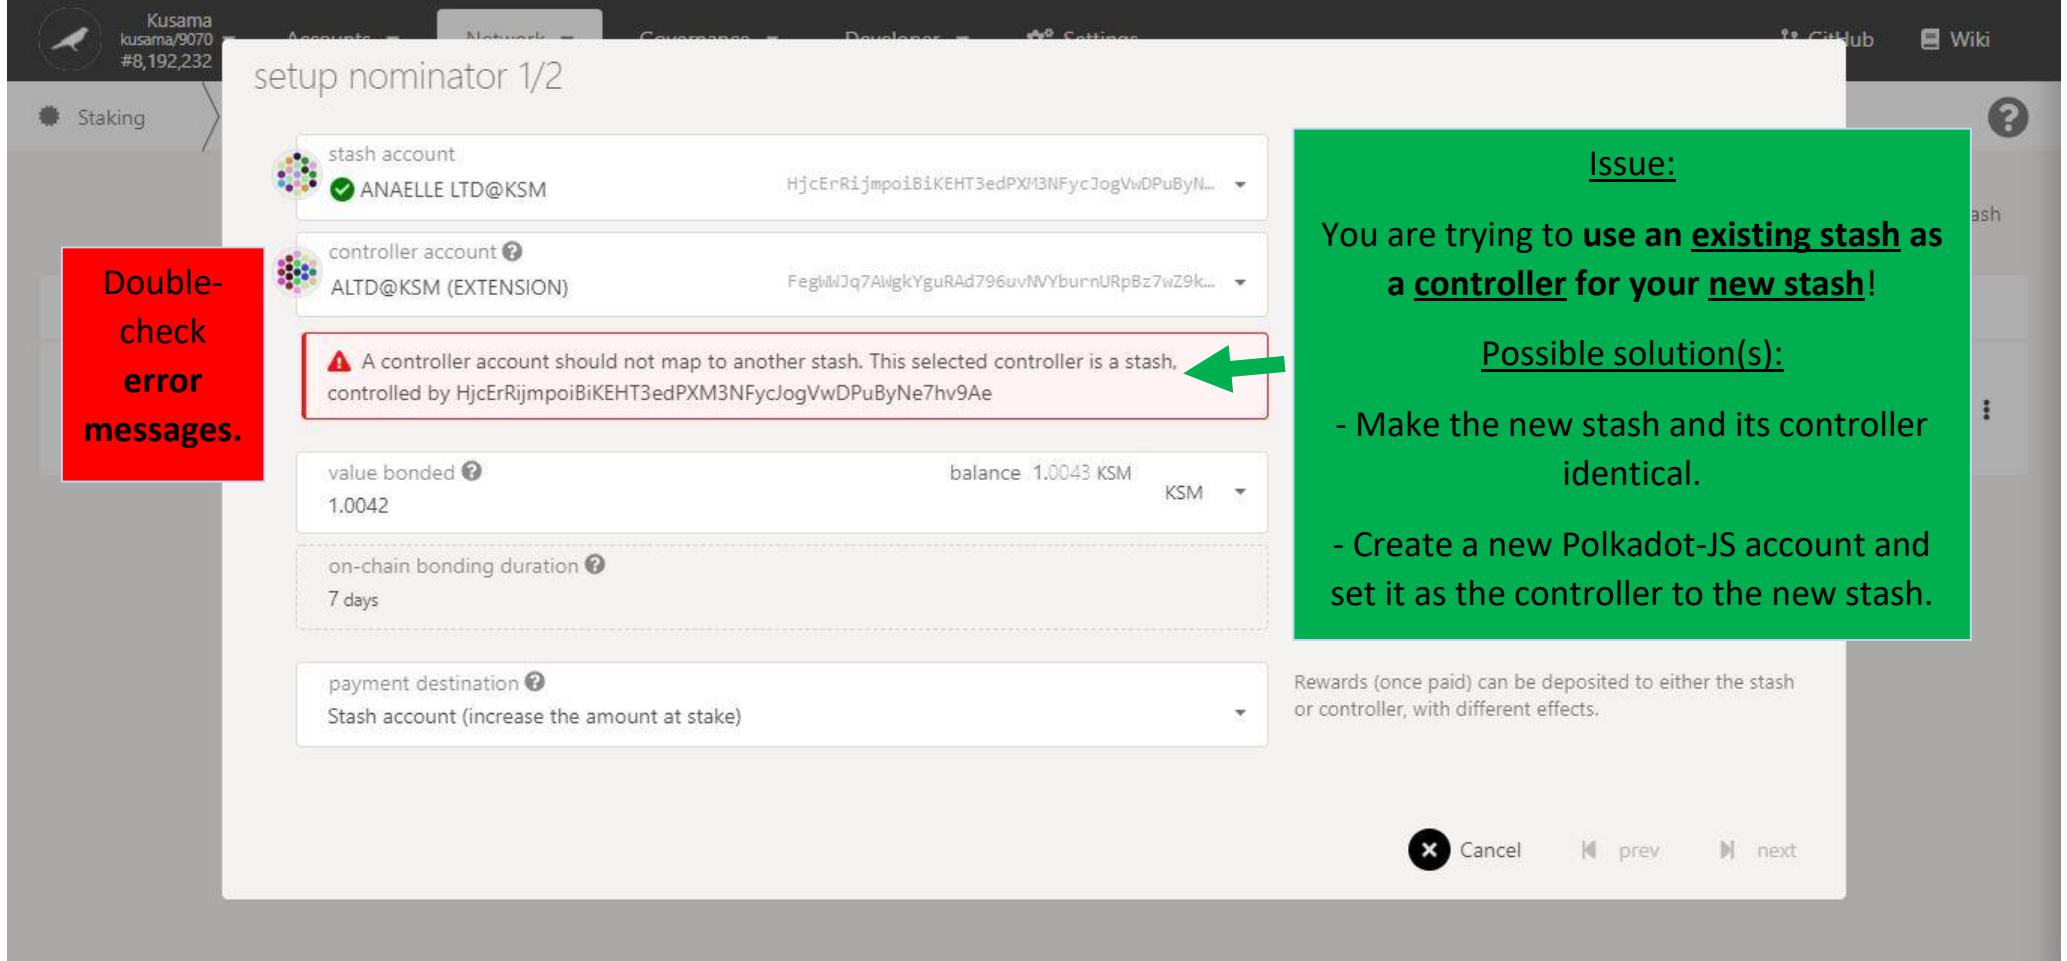

To ensure optimal fund security using the same stash/controller is strongly discouraged, but not forbidden.

The amount placed at-stake should not be your full available available amount to allow for transaction fees.

Once bonded, it will need to be unlocked/withdrawn and will be locked for at least the bonding duration.

Rewards (once paid) can be deposited to either the stash or controller, with different effects.

## [Troubleshooting 1/4]

Double-check error messages.

Issue:

You are trying to use an existing stash as a controller for your new stash!

Possible solution(s):

- Make the new stash and its controller identical.
- Create a new Polkadot-JS account and set it as the controller to the new stash.

Rewards (once paid) can be deposited to either the stash or controller, with different effects.

Cancel prev next

## [Troubleshooting 2/4]

The screenshot shows the Polkadot-JS extension interface for Kusama. The top bar includes tabs for Accounts, Network, Governance, Developers, and Settings, along with GitHub and Wiki links. The main area is titled "setup nominator 1/2". It displays fields for a stash account ("ALTD@KSM (EXTENSION)" with address FegIWWJq7AlWgkYguRAD796uvNVYburnURpBz7wZ9k...), a controller account ("LALA" with address HEjiAtKMqsi85R1LJ3qkxKjAZCwCJ6h2JRrKHk5...), and bonding details ("value bonded: 0.1 KSM", "on-chain bonding duration: 7 days"). A red error message box contains the text: "⚠ The controller does not have sufficient funds available to cover transaction fees. Ensure that a funded controller is used." A green arrow points from this message to a green callout box on the right. The callout box has a title "Issue:" and the text "Your chosen controller does not have enough KSM to pay for the transaction fees!". It also lists "Possible solution(s):" with two items: "- Add more funds to your chosen controller's balance." and "- Use a different controller that has a sufficient KSM balance." A note at the bottom of the callout box states: "Rewards (once paid) can be deposited to either the stash or controller, with different effects." Navigation buttons for "Cancel", "prev", and "next" are at the bottom right.

Double-check error messages.

Issue:

Your chosen controller does not have enough KSM to pay for the transaction fees!

Possible solution(s):

- Add more funds to your chosen controller's balance.
- Use a different controller that has a sufficient KSM balance.

Rewards (once paid) can be deposited to either the stash or controller, with different effects.

## [Troubleshooting 3/4]

staking.bondExtra queued

The details of the transaction including the type, the description (as available from the chain metadata) as well as meters and fee estimations (as available) for the type of call.

The sending account that will be used to send this transaction. Any applicable fees will be paid by this account.

Adding an optional tip to the transaction could allow for higher priority, especially when the chain is busy.

The call hash as calculated for this transaction

Cancel **Sign and Submit**

6. Click on **Sign & submit** to continue the procedure.

The screenshot shows the Polkadot.js extension interface for the Kusama network. A modal window titled "Transaction" is open, displaying the details of a "staking.bondExtra(signing)" transaction initiated from the "ALTD@KSM" stash account. The transaction summary includes the following information:

- from: <https://polkadot.js.org/apps/#/staking>
- chain: Kusama
- version: 9070
- nonce: 248
- method: ▶ staking.bondExtra(max\_additional)
- info: ▶ Add some extra amount that have appeared in the stash 'free...'.
- lifetime: mortal, valid from 8,192,414 to 8,192,478

To the right of the transaction details, a progress bar indicates the status of the transaction. A green arrow points to the progress bar with the text "Progress of the transaction." A yellow box highlights the progress bar area.

A yellow box on the left side of the interface contains the text: "Summary of the transaction sent via the Polkadot-JS extension." A green arrow points to this text from the left edge of the screen.

At the bottom of the transaction modal, there is a password input field and a checkbox labeled "Remember my password for the next 15 minutes". A green box highlights this area, and a green arrow points to it from the left side of the screen. Below this is a large orange button labeled "Sign the transaction". A green circle highlights this button.

Two numbered steps are overlaid on the interface:

7. Enter your account's password and tick the box to remember your password, if necessary.
8. Click on Sign the transaction to complete the procedure.

- Unbond funds.

The screenshot shows the Polkadot-JS Staking interface. At the top, there's a navigation bar with tabs for Accounts, Network (selected), Governance, Developer, and Settings. Below the navigation bar, there are tabs for Overview, Account actions (selected), Payouts, Targets, Waiting, Slashes (with a notification count of 1), and Validator stats. A sidebar on the left indicates the user is under the Staking section. The main content area displays a table of stashes. The columns are labeled: controller, rewards, bonded, and three dropdown menus for Active nominations (1), Inactive nominations (9), and Waiting nominations (5). At the bottom of the table, it says 10.0279 KSM. To the right of the table, there are buttons for Nominator (+), Validator (+), and Stash (+). A green arrow points to the three vertical dots next to the Stashed amount, which is highlighted with a blue box containing the instruction: "1. Click on the 3 vertical dots to view Staking settings."

1. Click on the 3 vertical dots to view Staking settings.

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

The screenshot shows the Polkadot-JS Staking interface. At the top, there are tabs: Staking, Overview, Account actions (which is selected), Payouts, Targets, Waiting, Slashes (with a notification count of 1), and Validator stats. Below the tabs are filters: All stashes (selected), Nominators, Validators, Inactive, and buttons to add a Nominator, Validator, or Stash. The main area displays 'stashes' with columns: controller, rewards, and bonded. Two stashes are listed: ALTD@KSM (EXTENSION) and ANAELLE LTD@KS. The ANAELLE entry shows it is Staked with 10.0279 KSM. To the right of the stashes are three buttons: Stop, a gear icon, and a more options icon. A green arrow points from a callout box to the 'Unbond funds' option in a dropdown menu. The callout box contains the text: "2. Click on Unbond funds to decrease the amount of KSM you are staking." The dropdown menu also includes: Bond more funds, Withdraw unbonded funds, Change controller account, Change reward destination, and Set nominees.

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

The screenshot shows the Polkadot-JS UI interface for the Kusama network. The top bar displays the network name 'kusama/9070 #8,192,445'. A blue header bar contains the text '3. Follow on-screen instructions carefully.' Below this, the main window title is 'unbond funds'. It lists two accounts: 'stash account' ALTD@KSM (EXTENSION) and 'controller account' ANAELLE LTD@KSM. The controller account has a green checkmark icon. A form below specifies 'unbond amount' as 10.0279 KSM and 'on-chain bonding duration' as 7 days. A note states: 'The stash and controller pair, here the controller will be used to send the transaction.' Another note says: 'The funds will only be available for withdrawal after the unbonding period, however will not be part of the staked amount after the next validator election. You can follow the unlock countdown in the UI.' At the bottom right are 'Cancel' and 'Unbond' buttons, with 'Unbond' being circled in green.

3. Follow on-screen instructions carefully.

The stash and controller pair, here the controller will be used to send the transaction.

The funds will only be available for withdrawal after the unbonding period, however will not be part of the staked amount after the next validator election. You can follow the unlock countdown in the UI.

Cancel  Unbond

4. Click on **Unbond** to continue the procedure.

**Nature of the transaction.**

The screenshot shows the Polkadot-JS extension interface for a Kusama node. The top bar displays the node name 'kusama/9070' and the block number '#8,192,452'. The main window title is 'authorize transaction' under the 'Staking' tab. The transaction details are as follows:

- Sending transaction:** staking.unbond(value)
- Description:** Schedule a portion of the stash to be unlocked ready for transfer out after the bond period ends. If this leaves an amount actively bonded less than `T::Currency::minimum_balance()`, then it is increased to the full amount.
- Fees:** Fees of 41.6662 micro KSM will be applied to the submission (highlighted with a green border).
- Account:** sending from my account, ANAELLE LTD@KSM
- Call Hash:** HjcErRijmpoiBiKEHT3edPXH3NFycJogVwDPuByN... (highlighted with a green border)
- Fee Estimation:** 0x04f4bac2282fd711c009122f52b6ace5425ecd3e6797f98f56aee5ded8f7256b
- Fee Selection:** Do not include a tip for the block author (checkbox)
- Sign and Submit:** A button with a toggle switch.
- Cancel:** A button with a cancel icon.
- Sign and Submit:** A button with a right-pointing arrow icon, circled in green.

**5. Check the transaction fees.**

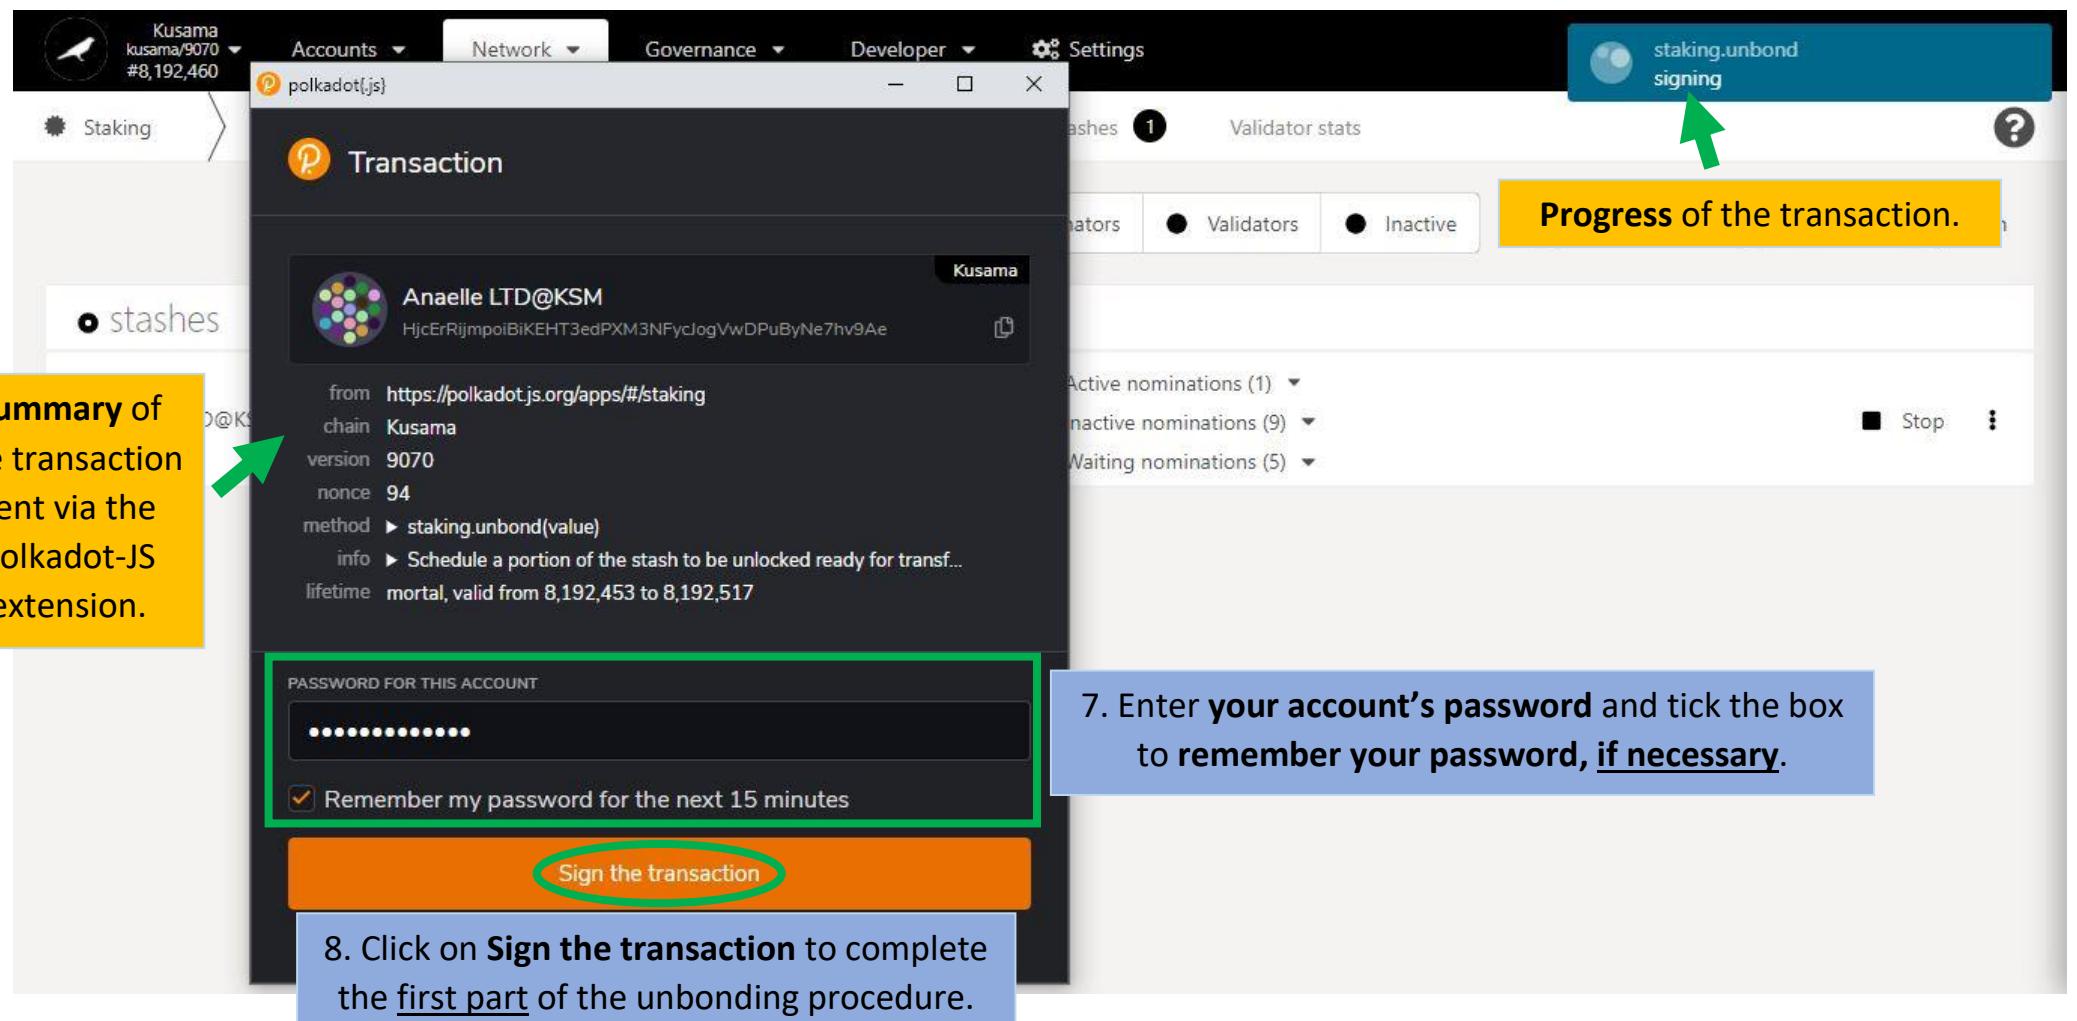

The details of the transaction including the type, the description (as available from the chain metadata) as well as any parameters and fee estimations (as available) for the specific type of call.

The sending account that will be used to send this transaction. Any applicable fees will be paid by this account.

Adding an optional tip to the transaction could allow for higher priority, especially when the chain is busy.

The call hash as calculated for this transaction

**6. Click on Sign & submit to continue the procedure.**

9. Your funds have now entered an unbonding period! You will need to wait for 7 days before you can complete the procedure.

10. After 7 days, your unbonded funds  
are now ready to be withdrawn!

The screenshot shows the Polkadot-JS dashboard with a blue header bar containing the text "10. After 7 days, your unbonded funds are now ready to be withdrawn!". Below the header is a navigation bar with links for Governance, Developer, Settings, GitHub, and Wiki. The main content area is titled "stashes" and shows two entries: "ALTD@KSM (EXTENSION)" and "ANAEILLE LTD@KS". For the "ANAEILLE LTD@KS" entry, the status is "Staked" with amounts "8.0299 KSM" and "2.0503 KSM" followed by a padlock icon. To the right of these values are dropdown menus for "Active nominations (1)", "Inactive nominations (6)", and "Waiting nominations (6)". At the bottom right of the stashes table are "Stop" and "⋮" buttons. A green arrow points to the padlock icon.

11. Click on the **padlock icon** to start the  
second part of the unbonding procedure.

**Nature of the transaction.**

The screenshot shows the Polkadot-JS extension interface for Kusama. The main title is "authorize transaction". Below it, a message says "Sending transaction staking.withdrawUnbonded(num\_slashing\_spans)". It also says "Remove any unlocked chunks from the unlocking queue from our management.". A green box highlights the text "Fees of 40.6663 micro KSM will be applied to the submission". To the right, a blue box contains the transaction details: "staking.withdrawUnbonded queued". A green arrow points from the text "Nature of the transaction." to this box. Below the transaction details, there's a note about sending fees and a switch for "Do not include a tip for the block author". Further down, a "call hash" is shown: "0xfbab068436a3732c6d321bc6b9069fb58bbea4661c5ffede0e5f509d51fb16174". At the bottom, there are "Sign and Submit" and "Cancel" buttons. A green oval highlights the "Sign and Submit" button. A blue box labeled "12. Check the transaction fees." is positioned above the transaction details, and another blue box labeled "13. Click on Sign & submit to continue the procedure." is positioned below the "Sign and Submit" button.

authorize transaction

Sending transaction staking.withdrawUnbonded(num\_slashing\_spans)

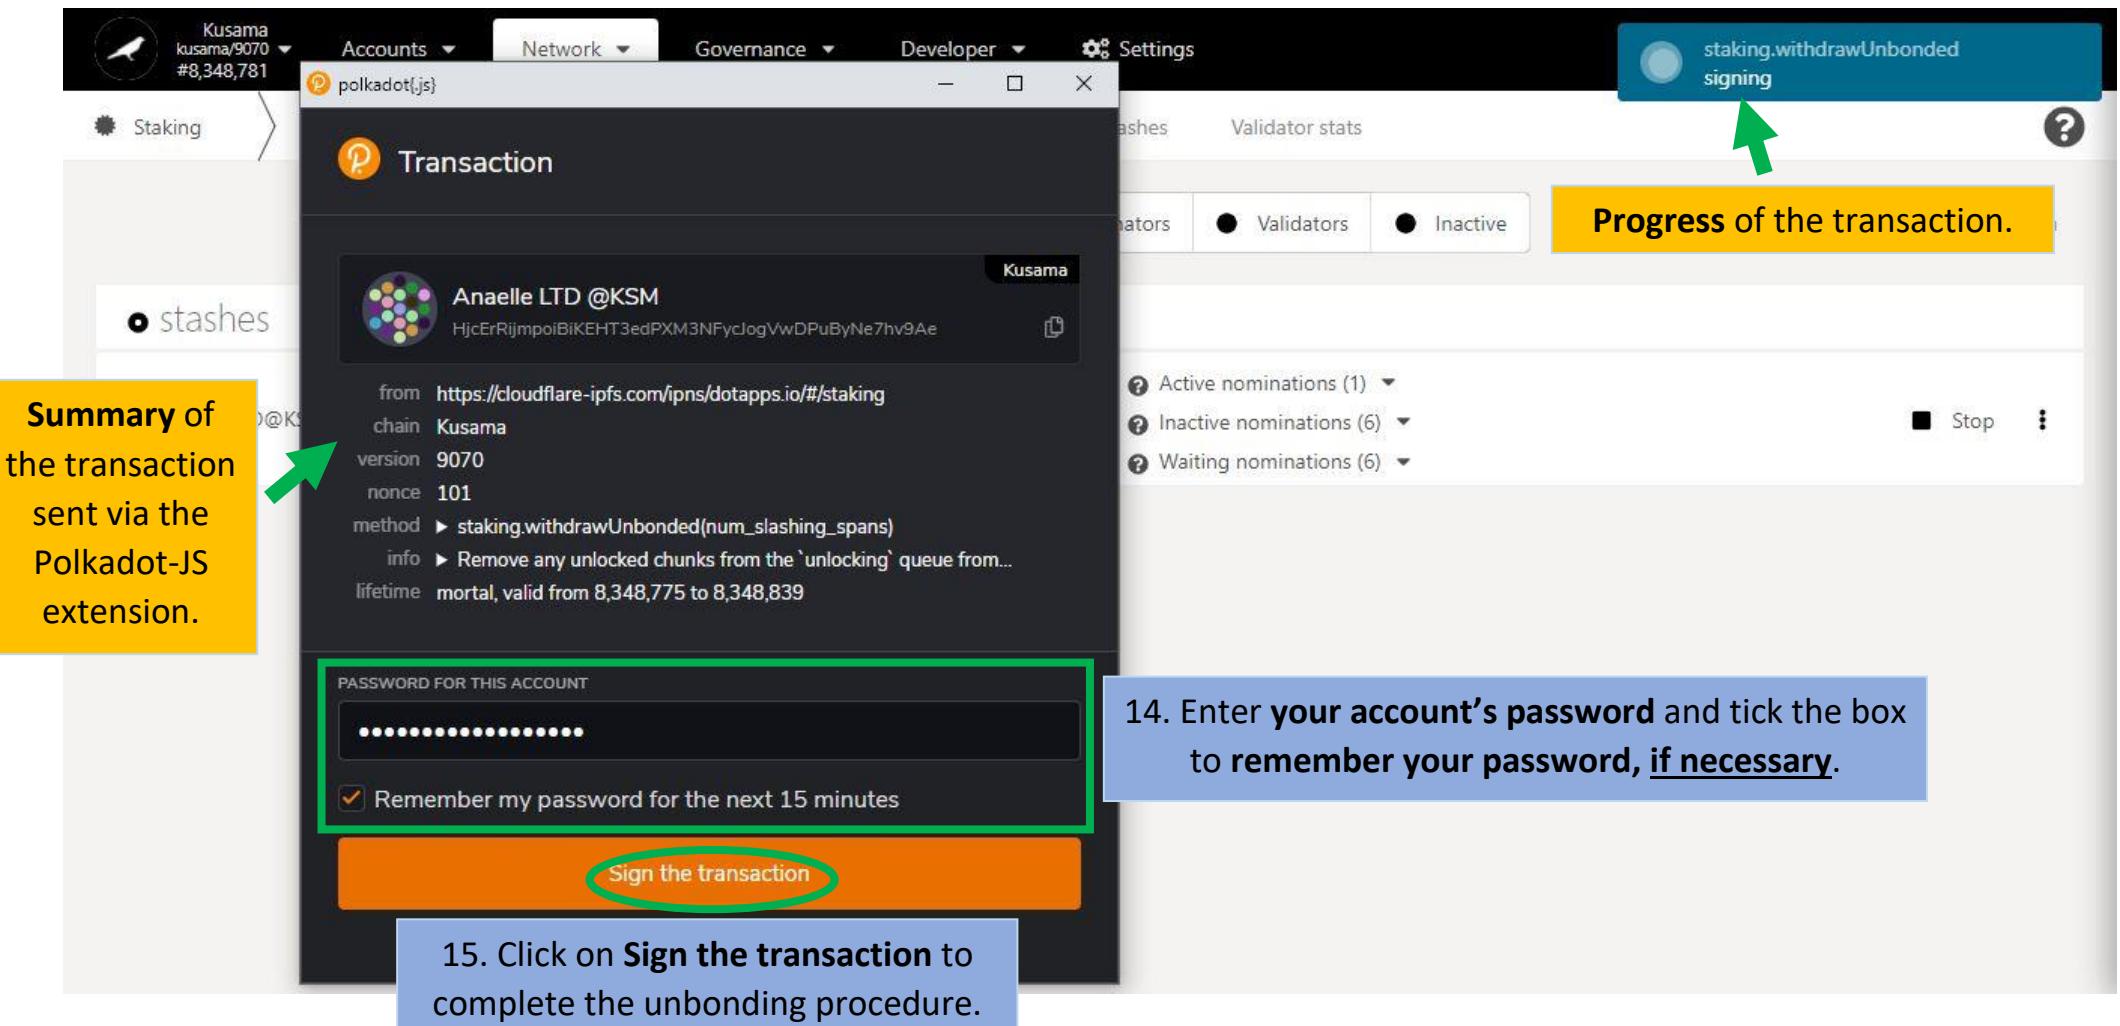

Remove any unlocked chunks from the unlocking queue from our management.

Fees of 40.6663 micro KSM will be applied to the submission

staking.withdrawUnbonded queued

12. Check the transaction fees.

13. Click on Sign & submit to continue the procedure.

- Change controller account.

The screenshot shows the Polkadot-JS interface for the Kusama network. The top navigation bar includes 'Accounts', 'Network' (selected), 'Governance', 'Developer', 'Settings', 'GitHub', and 'Wiki'. Below the navigation is a sub-menu for 'Staking' with tabs for 'Overview', 'Account actions' (selected), 'Payouts', 'Targets', 'Waiting', 'Slashes (1)', and 'Validator stats'. A help icon is also present. The main content area displays 'stashes' information for the account 'ANAEILLE LTD@KS'. It lists two stashes: 'ALTD@KSM (EXTENSION)' and 'ANAEILLE LTD@KS'. The 'ANAEILLE LTD@KS' stash has a balance of 10.0279 KSM and is marked as 'Staked'. To the right of the stash details are three dropdown menus: 'Active nominations (1)', 'Inactive nominations (9)', and 'Waiting nominations (5)'. A green arrow points to the three vertical dots next to the 'Waiting nominations' menu. A blue callout box contains the instruction: '1. Click on the 3 vertical dots to view Staking settings.' The bottom right corner of the interface shows the Polkabot logo.

1. Click on the 3 vertical dots to  
view **Staking settings**.

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

The screenshot shows the Polkadot-JS Staking interface with the 'Account actions' tab selected. At the top, there are tabs for Overview, Account actions (which is active), Payouts, Targets, Waiting, Slashes (with a notification count of 1), and Validator stats. Below the tabs are filter buttons: 'All stashes' (selected), 'Nominators', 'Validators', 'Inactive', and buttons to '+ Nominator', '+ Validator', and '+ Stash'. The main area displays a table for 'stashes'. The first row shows 'ALTD@KSM (EXTENSION)' as the controller, with 'rewards' and 'bonded' columns. The bonded amount is 10.0279 KSM. To the right of this row are three dropdown menus: 'Active nominations (1)', 'Inactive nominations (9)', and 'Waiting nominations (5)'. On the far right of this row are 'Stop' and 'More' (three dots) buttons. A green arrow points from a callout box to the 'Change controller account' button in a context menu that appears over the 'More' button. The callout box contains the following text: '2. Click on Change controller account to set a new controller for this stash.' The context menu itself includes options: 'Bond more funds', 'Unbond funds', 'Withdraw unbonded funds', 'Change controller account' (which is highlighted with a green arrow), 'Change reward destination', and 'Set nominees'.

2. Click on **Change controller account** to set a new controller for this stash.

- Bond more funds
- Unbond funds
- Withdraw unbonded funds
- Change controller account**
- Change reward destination
- Set nominees

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

The screenshot shows the Polkadot-JS extension interface with the title "change controller account". It displays two sections: "stash account" and "controller account", both set to "ALTD@KSM (EXTENSION)". Below these sections is a yellow-bordered warning message: "⚠️ Distinct stash and controller accounts are recommended to ensure fund security. You will be allowed to make the transaction, but take care to not tie up all funds, only use a portion of the available funds during this period." A green arrow points to this warning message. At the bottom right of the dialog are two buttons: "Cancel" and "➡️ Set controller". The "Set controller" button is circled in green. To the left of the dialog, a blue box contains the instruction "4. Double-check warning messages." To the right, another blue box contains the instruction "5. Click on Set controller to continue the procedure."

4. Double-check  
warning  
messages.

5. Click on **Set controller** to continue the procedure.

Nature of the transaction.

The screenshot shows the Polkadot-JS extension interface for Kusama. The top bar displays the network name 'kusama/9070 #8,192,487'. The main title is 'authorize transaction' for the call 'staking.setController(controller)'. A message box states 'Fees of 50.3328 micro KSM will be applied to the submission'. Below this, it says 'sending from my account ALTD@KSM (EXTENSION)' and provides a 'call hash' (0xad09c459c66cd2fc0b85240012bcd19e1bec407e2e32222743412fd0b56d3093). There is a toggle switch for 'Do not include a tip for the block author'. At the bottom, there are 'Sign and Submit' and 'Cancel' buttons, with 'Sign and Submit' circled in green. A yellow box labeled '6. Check the transaction fees.' is overlaid on the left side. A green arrow points from the text 'Nature of the transaction.' to the 'staking.setController queued' status in the top right corner. A blue box labeled '7. Click on Sign & submit to continue the procedure.' is overlaid at the bottom right.

### 2. Check your own existing pools.

Nomination pools in details:

Nomination pools allow people to bond their funds together under a single entity called “pool”. There are different roles that members can observe within a pool.

**Creator:** The initial member who paid the pool deposit and must be last to leave the pool.

**Nominator:** The member who picks pool validators.

**Toggler:** The member who opens, blocks, or destroys the pool.

**Root:** The member who can change/override certain roles within the pool.

Note: Funds that are bonded in a pool cannot be used to vote during referenda or to elect councillors. Pool members need to unbond and unlock their stake before they can switch pools.

3. Click All Pools to view all the pools registered on the network.

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

The screenshot shows the Polkadot.js Network interface. At the top, there's a navigation bar with tabs for Accounts, Network (selected), Governance, Developer, and Settings. On the far right are links for GitHub and Wiki. Below the navigation bar, there's a sub-navigation bar with tabs for Staking, Overview, Accounts, Payouts, Pools (selected), Targets, Bags, Slashes, and Validator stats. A question mark icon is also present.

The main content area displays a summary of pools: 60 / 64 pools, max. members 65,536, and max. members / pool 16. There are two filter buttons: "Own pools" (unchecked) and "All pools" (checked). A "Add pool" button is located on the right.

The "pools" section lists one pool entry:

1	https://amforc.com   3% commission	Open	658.7231 KSM
creator	AMFORC/NP-ROOT		
root	AMFORC/NP-ROOT		
nominator	AMFORC/NP-NOMIN		
toggler	AMFORC/NP-TOGLL		
stash	POOL 1 (STASH)		
rewards	POOL 1 (REWARD)		

A green box highlights the creator, root, nominator, toggler, stash, and rewards rows. A blue box highlights the "6. Click on the arrow to view all pool administrators." text and points to the arrow icon next to the stash row.

On the right side, a sidebar shows a list of pool administrators for AMFORC/1:

AMFORC/1	35.0000 KSM
AMFORC/2	JHRagt...HZBDfP 102.0151 KSM
AMFORC/3   KARURA	JEddyd5...KWEKvs 83.5067 KSM
AMFORC/4	CrYym7...5rPpCd 0.0000 KSM
AMFORC/5	G5CX94...Tm2QdN 0.5000 KSM

A green arrow points to the arrow icon at the end of the sidebar list.

- Bond funds and join pools.

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

The screenshot shows the Polkadot.js interface with the following details:

- Header:** Kusama, kusama/9271, Accounts, Network, Governance, Developer, Settings, GitHub, Wiki.
- Left sidebar:** Staking, pools (60 / 64), Own pools, pools (selected), 1 https://, 2 SWISS https://twitter.com/swiss\_pool.
- Current view:** join nomination pool.
- Form fields:**
  - join pool from: ANAELLE LTD@KSM, HjcErRijmpoiBiKEHT3edPXMBNFycJogVwDPuByN...
  - initial value: 0.1000, KSM dropdown.
- Instructions:**
  - 2. Follow on-screen instructions carefully. (A green box highlights the account input field.)
  - The account that is to join the pool.
  - The initial value to assign to the pool. It is set to the maximum of the minimum bond and the minum nomination value.
- Buttons:** + Join (circled in green).

**2. Follow on-screen instructions carefully.**

The account that is to join the pool.

The initial value to assign to the pool. It is set to the maximum of the minimum bond and the minum nomination value.

**3. Click on **Join** to continue the procedure.**

The screenshot shows the Polkadot.js extension interface for the Kusama network. The top navigation bar includes links for Accounts, Network, Governance, Developer, and Settings. Below the navigation is a sidebar with Staking, Overview, Accounts, Governance, People, Transfers, Pools, Circles, and Multidimensional tabs. The Staking tab is selected, showing 60 / 64 pools. A sub-menu for 'Own pools' is open. The main content area is titled 'authorize transaction' and shows the following steps:

- Sending transaction nominationPools.join(amount, poolId)
- Stake funds with a pool. The amount to bond is transferred from the member to the pools account and immediately increases the pools bond.
- Fees of 49.4295 micro KSM will be applied to the submission (highlighted with a green box).

Below these steps are several configuration options:

- sending from my account: ANAELLE LTD@KSM
- HjcErRijmpoiBiKEHT3edPXl3NFycJogVwDPuByN... (transaction hash)
- Do not include a tip for the block author (checkbox)
- call hash: 0xd661bd13a4e1da549f215fd3dcce639cfec91f59e66c96c62f42ad72843130c2
- Sign and Submit (button)
- Sign and Submit (button, circled in green)

A blue callout box labeled '4. Check the transaction fees.' points to the third step. Another blue callout box labeled '5. Click on Sign & submit to continue the procedure.' points to the 'Sign and Submit' button at the bottom right.

5. Click on **Sign & submit** to continue the procedure.

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

The screenshot shows the Polkadot-JS extension interface. A yellow box on the left contains the text: "Summary of the transaction sent via the Polkadot-JS extension." A green arrow points from this text to the "Sign the transaction" button in the central dialog. The dialog is titled "Transaction" and shows details for a pool named "Anaelle LTD@KSM". The transaction summary includes:

- from: <https://polkadot.js.org/apps/?rpc=wss%3A%2F%2Fkusama-rpc.polkadot.io#/staking/pools>
- chain: Kusama
- version: 9271
- nonce: 464
- method: nominationPools.join(amount, poolId)
- info: Stake funds with a pool. The amount to bond is transferred from the user's account to the pool.
- lifetime: mortal, valid from 14,413,612 to 14,413,676

Below the summary, there is a checkbox: "Extend the period without password by 15 minutes" followed by a large orange button labeled "Sign the transaction".

A blue box at the bottom contains the instruction: "6. Click on Sign the transaction to complete the procedure."

The background shows a list of pools with their details:

pool	points	Nominees	Members	Join

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

The screenshot shows the Polkadot.js Network interface. At the top, there are tabs for Accounts, Network (selected), Governance, Developer, and Settings. Below the tabs, there are sub-tabs for Overview, Accounts, Payouts, Pools (selected), Targets, Bags, Slashes, and Validator stats. A question mark icon is in the top right corner. On the left, a sidebar shows a Staking icon and the text "Staking". The main area displays a pool named "GATOTECH" with details: state "Open", points "28.8729 KSM", nominees "24", members "4", and a "Join" button. The max. members are "65,536" and the max. members / pool is "16".

### 7. The pool is now visible in your own pools!

This screenshot shows the same Polkadot.js interface, but the Pools tab is selected. The main area displays a list of pools, with one pool highlighted: "GATOTECH" (Top tech decentralisation) with 8 members. The interface includes tabs for "Own pools" (selected) and "All pools". Other tabs include Overview, Accounts, Payouts, Targets, Bags, Slashes, and Validator stats. The max. members are "65,536" and the max. members / pool is "16".

This screenshot shows the same Polkadot.js interface, but the Pools tab is selected. The main area displays a list of pools, with one pool highlighted: "GATOTECH" (Top tech decentralisation) with 8 members. The interface includes tabs for "Own pools" (selected) and "All pools". Other tabs include Overview, Accounts, Payouts, Targets, Bags, Slashes, and Validator stats. The max. members are "65,536" and the max. members / pool is "16".

### 8. Your account appears under the list of pool members!

This screenshot shows the same Polkadot.js interface, but the Pools tab is selected. The main area displays a list of pools, with one pool highlighted: "GATOTECH" (Top tech decentralisation) with 8 members. The interface includes tabs for "Own pools" (selected) and "All pools". Other tabs include Overview, Accounts, Payouts, Targets, Bags, Slashes, and Validator stats. The max. members are "65,536" and the max. members / pool is "16". In the bottom right corner, a callout box highlights the "ANAEILLE LTD@KS" account in the "Members (4)" list.

- Unbond funds and leave pools.

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

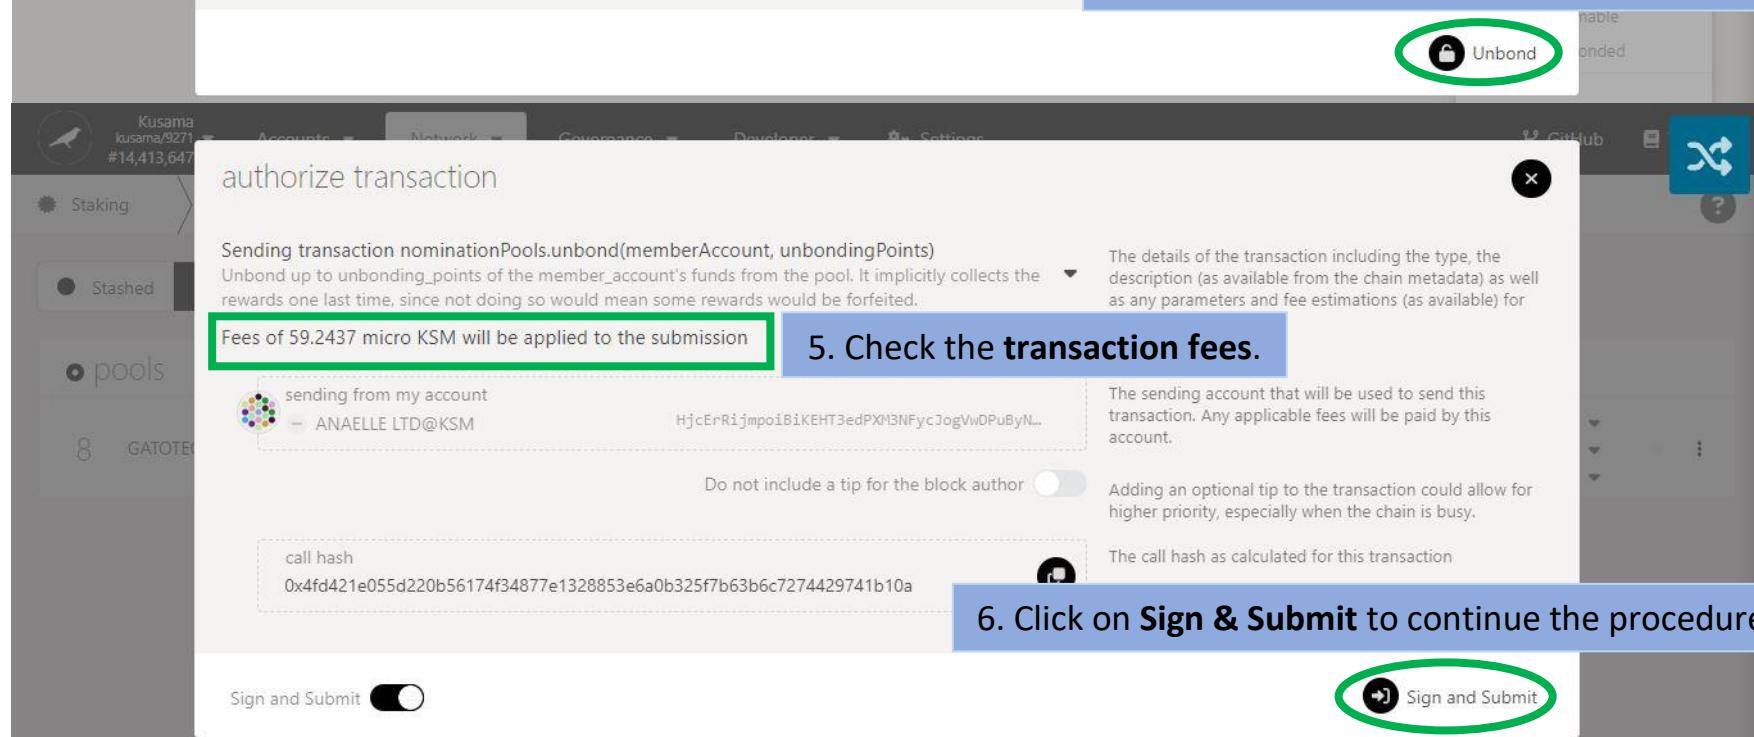

3. Follow on-screen instructions carefully.

The pool and pool member that is to be affected. The transaction will be sent from the associated pool member account.

The amount to unbond. It should be less or equal to the full bonded amount.

4. Click on **Unbond** to continue the procedure.

5. Check the transaction fees.

The details of the transaction including the type, the description (as available from the chain metadata) as well as any parameters and fee estimations (as available) for

The sending account that will be used to send this transaction. Any applicable fees will be paid by this account.

Adding an optional tip to the transaction could allow for higher priority, especially when the chain is busy.

The call hash as calculated for this transaction

6. Click on **Sign & Submit** to continue the procedure.

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

The screenshot shows the Polkadot-JS extension interface for the Kusama network. The main window displays a transaction for an unbonding operation. The transaction details are as follows:

- from: <https://polkadot.js.org/apps/?rpc=wss%3A%2F%2Fkusama-rpc.polkadot.io#staking/pools>
- chain: Kusama
- version: 9271
- nonce: 465
- method: nominationPools.unbond(memberAccount, unbondingPoints)  
info: Unbond up to `unbonding\_points` of the `member\_account`'s ...
- lifetime: mortal, valid from 14,413,647 to 14,413,711

A green arrow points to the "Sign the transaction" button, which is highlighted with a green circle. A yellow box on the left contains the following text:

**Summary of the transaction sent via the Polkadot-JS extension.**

7. Click on **Sign the transaction** to complete the first part of the unbonding procedure.

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

The screenshot shows the Polkadot.js extension interface for the Kusama network. The top navigation bar includes links for Accounts, Network, Governance, Developer, Settings, GitHub, and Wiki. Below the navigation is a breadcrumb menu: Staking > Overview > Accounts > Pools. Under the "Pools" tab, there are two options: "Stashed" (selected) and "Pooled" (highlighted with a checkmark). A blue callout box in the center of the screen displays the following text:

**8. Your funds have now entered an unbonding period!**  
You will need to wait for 7 days before you can complete the procedure.

The main content area shows a table of pools. One row is highlighted with a dark background and white text, indicating an unbonding process:

	account	bonded	claimable
8	GATOTECH 🐱 Top tech decentralisation <a href="https://gatotech.uk/pools">gatotech.uk/pools</a>	Unbonding 0.1000 KSM 98,041 blocks, 6 days 19 hrs	0.1000 KSM

On the right side of the pool table, there are three dropdown menus for nominations:

- Active nominations (1)
- Inactive nominations (10)
- Waiting nominations (13)

[TBC]

- Add pools.

[TBC]

- Remove pools.

[TBC]

## e) Check nomination targets.

1. Click Targets.

total staked  
5.4360 MKSM 48%

returns  
15.4%

lowest / avg staked  
4,184 / 6,040 KSM 69%

last reward  
571.7473 KSM

Key information on staking targets: **average returns, amount staked, and amounts rewarded.**

Most profitable      Nominate selected

Next session      Produced blocks      Online message      Nominating      Oversubscribed      Slashed      Blocks nominations

filter by name, address or index

single from operator      no 20%+ comm      no at capacity      recent payouts      only elected      only with an identity

validators       nominators

nominators	comm.	total stake	own stake	return
53	1079	0.00%	5,201.0601 KSM	53.2691 KSM 17.85%
40	992	0.00%	5,201.1276 KSM	52.2532 KSM 17.85%
38	396	0.00%	5,204.0231 KSM	10.1186 KSM 17.84%
35	1135	0.00%	5,205.6390 KSM	55.0159 KSM 17.83%

2. Switch the **filters ON or OFF** to display your **targeted data**.

Ex: You can choose to view only validators who take <20% commission and are not full.

This validator is in your **current selection of validators**.

3. Scan through validators' data and **compare it to your staking targets**.

The screenshot shows the Polkadot-JS Staking interface. At the top, there's a navigation bar with tabs for Accounts, Network, Governance, Developer, and Settings. Below the navigation bar, there's a header with a user icon, the network name 'Kusama', account details 'kusama/9070 #8,195,592', and a total staked amount of '5.4360 MKSM' (48%). The main content area is titled 'Validators' and displays a table of validators. The table has columns for rank, name, nominators, commission, total stake, own stake, return, and checkboxes for selecting validators. A note at the top right says: '5. Click on Nominate selected to replace your current list of validators with a new selection. Note: If you do not select your current active validator, it will be removed!' Below this, another note says: 'You can click Most profitable to automatically select the top 16 rewarders.' A green arrow points from the 'Nominate selected' button to the table. A green box highlights the checkboxes in the last three rows of the table.

			nominators	comm.	total stake	own stake	return		
★	11	ALLNODES/41	53	1079	0.00%	5,201.0601 KSM	53.2691 KSM	17.85%	<input checked="" type="checkbox"/>
★	12	SHOTMAKER/0	40	992	0.00%	5,201.1276 KSM	52.2532 KSM	17.85%	<input checked="" type="checkbox"/>
★	15	STAKE-OPS/1	38	396	0.00%	5,204.0231 KSM	10.1186 KSM	17.84%	<input type="checkbox"/>
★	17	MELANGE	35	1135	0.00%	5,205.6390 KSM	55.0159 KSM	17.83%	<input checked="" type="checkbox"/>

4. Tick the box to select **10-16 validators** that match your staking targets.

## f) Check nomination bags:

- View bags

1. Click Bags.

total bags  
164

total nodes  
10,393

my nodes  
1

**Key information on nomination bags (i.e semi-sorted lists of nominators within a particular stake range):**

**total numbers of bags, total number of nodes, and number of nodes linked to your stashes.**

The All bags list is composed of bags that each describe a range of active bonded funds of the nominators. In each bag is a list of nodes that correspond to a nominator and their staked funds.

Within the context of a single bag, nodes are not sorted by their stake, but instead placed in insertion order. In other words, the most recently inserted node will be the last node in the bag, regardless of stake. Events like staking rewards or slashes do not automatically put you in a different bag. The bags-list pallet comes with an important permissionless extrinsic: rebag. This allows anyone to specify another account that is in the wrong bag, and place it in the correct one.

bags	max	min	first	last	stashes	nodes
	103.2777 KSM	90.1564 KSM	GvdptK...CHQPxr	MC/02	KSM 100,6185 KSM	Move up 20 129

Maximum and minimum bonded amounts for this bag of nominations.

First and last inserted stashes/nodes for this bag of nominations.

Owned stash/node inserted in this bag of nominations.

Total number of stashes/nodes inserted in this bag of nominations.

2. Check the information for your owned bags.

g) Check the list of waiting validators.

1. Click Waiting.

The screenshot shows the Polkadot-JS Staking interface. At the top, there is a navigation bar with tabs: Accounts, Network, Governance, Developer, Settings, GitHub, and Wiki. Below the navigation bar, there is a sub-navigation bar with tabs: Overview, Account actions, Payouts, Targets, Waiting (which is highlighted with a green arrow), Slashes (with a notification badge '1'), and Validator stats. There are also several status indicators: Next session, Produced blocks (5), Online message, Nominating, Oversubscribed, Slashed, and Blocks nominations. A search bar is present with the placeholder "filter by name, address or index". A toggle switch is set to "only with an identity". On the left, there is a section titled "intentions" listing various validators with their logos and names: TWINNET/STASH, KEEPNODE/HYDROGEN, JACO/V37, ZUG CAPITAL/82, RYABINA/[44] T.ME/KUSAMA\_BOT, JACO/V36, and RYABINA/[47] T.ME/KUSAMA\_BOT. On the right, there is a table titled "nominators" with columns: nominators, commission, and PS. The table lists seven rows of nominations, each with a dropdown menu and a PS icon. The last row is highlighted with a green box and a green arrow pointing to the PS icon.

nominators	commission	PS
Nominations (10)	10.00%	
Nominations (134)	2.00%	
Nominations (34)	2.00%	
Nominations (21)	2.50%	
Nominations (47)	3.00%	
Nominations (26)	2.00%	
Nominations (22)	3.00%	

Number of nominations **backing each unelected validator.**

h) Check the list of slashed validators.

1. Click **Slashes**.

Key information on staking slashes: **validators & nominators concerned, time frames, amount.**

funds 17 active raised / cap 281,579 / 11.3760 MKSM 2%

total raised / cap 988,652 / 13.8760 MKSM 7%

## 2. Double-check warning messages.

Do not transfer any funds directly to a specific account that is associated with a loan or a team. Use the "Contribute" action to record the contribution on-chain using the crowdloan runtime module. When the fund is dissolved, after either the parachain lease expires or the loan ending without winning, the full value will be returned to your account by the runtime. Funds sent directly to an account, without using the crowdloan functionality, may not be returned by the receiving account.

11. Your contributing account and contribution amount are now visible!

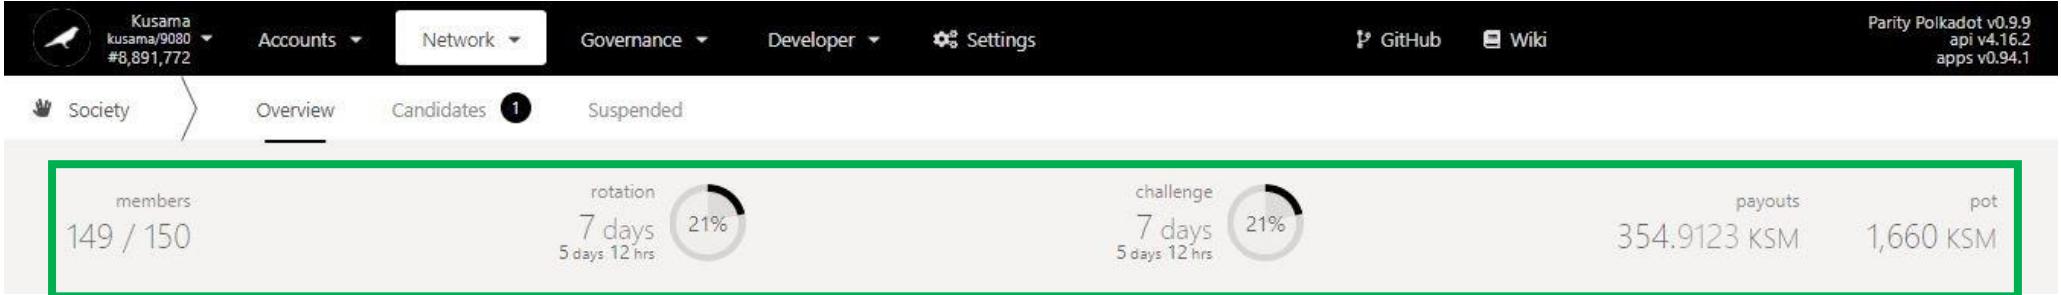

#### 4. Gilt: View and participate in auctions for inflation-protected KSM derivatives. [TBC]

## 5. Society: View and participate in *Kappa Sigma Mu* activities.

a) View Society members' roles.

The screenshot shows the Polkadot.js Network interface for the Kusama network. The top navigation bar includes links for Accounts, Network (selected), Governance, Developer, Settings, GitHub, and Wiki. The bottom navigation bar shows tabs for Society (selected), Overview, Candidates (1), and Suspended. A green box highlights the Society section, which displays the following information:

members	rotation	challenge	payouts	pot
149 / 150	7 days 5 days 12 hrs 21%	7 days 5 days 12 hrs 21%	354.9123 KSM	1,660 KSM

A yellow callout box below the Society section contains the text: "Key information on Society: number of members, countdown to the change of members' roles, time left for the completion of challenges, scheduled payouts to members, total value of Society's pot."

The screenshot shows the Polkadot.js interface with a green border around the left sidebar. The sidebar includes sections for 'defender' (with a user icon and address DzUa9P...orxbzu), 'members' (with a user icon and address 42NQM), and a list of member addresses with their roles: THE FOUNDER (founder), JAM (skeptic), NING (skeptic), 4Xmec (skeptic), SBBVG (skeptic, payout), JFGuwL...Bpzq2h (skeptic), SRXV2 (skeptic), Fr6Pbz...o7BwCw (skeptic), HyfGd2...Li92nn (skeptic), ED74i7...PN7LE4 (skeptic), Hpaece...ZGRst6 (skeptic), KSM (voted), and DiWvn...bnz2Dv (strikes).

### Society roles in details:

The Kappa Sigma Mu (KΣM) is a Kusama-native organisation created on 20<sup>th</sup> January 2020.

The Society has a set of pre-defined on-chain and off-chain rules for membership acquisition, role attribution, and challenge completion.

**Members:** Kusama blockchain users who have successfully been vetted by the Society.

**Candidate:** A user who has submitted a bid and Proof-of-Ink (Pol) to become a member and must receive approvals from the members to join the Society. Also known as “Member-candidate”.

**Defender:** A member who has submitted a Proof-of-Ink (Pol) and must receive approvals from the members to remain in the Society. Also known as “Challenged-member”.

**Society head:** A winning candidate chosen at random to become a Head. Also known as the “parent member”.

**Founder:** The anonymous user who founded the Society. Also known as the “original Head”.

**Skeptic:** A member who has been selected to vote by approving or rejecting a Candidate’s bid or a Defender’s Pol. Note: A no-vote equals to a rejection.

The screenshot shows the Polkadot.js interface with a grey border. At the top right, there are buttons for 'Approvals (1)' and 'Vote'. Below that is a table with columns 'voted on' and 'strikes'. The table lists the following data:

voted on	strikes
	0 ⚡
	2 ⚡
	6 ⚡

KSM strikes		
DiWvsn...bnz2Dv		

**Society activities in detail:**

The Society has an extensive system of pre-defined tasks and feedback mechanisms to ensure that all members remain honest and engaged over time.

**Votes:** Approval or rejection of a Candidate's bid or a Defender's Pol. One of all members' votes is randomly selected as the final vote on a Candidate or Defender.

**Strikes:** Punishment for failure to vote or for voting opposite to the randomly selected final vote. Note: The maximum number of strikes is 10.

**Payouts:** Reward for being a member of the Society that is based on the original bid amount. This amount is taken from the Society pot, which is funded by a 0.2% burn of Kusama Treasury. Note: Payouts need to be claimed manually.

**Slashes:** Punishment for voting opposite to the randomly selected final vote. This amount is taken from the opposing member's pending payout and transferred as an escrowed reward to the approving member's payout.

**Payouts (1)**

A green box highlights the "Payouts (1)" dropdown arrow, with a green arrow pointing to it. A blue box contains the instruction: "1. Click on the dropdown arrow to view the payout information."

## GUIDE TO POLKADOT-JS – PART II: Network

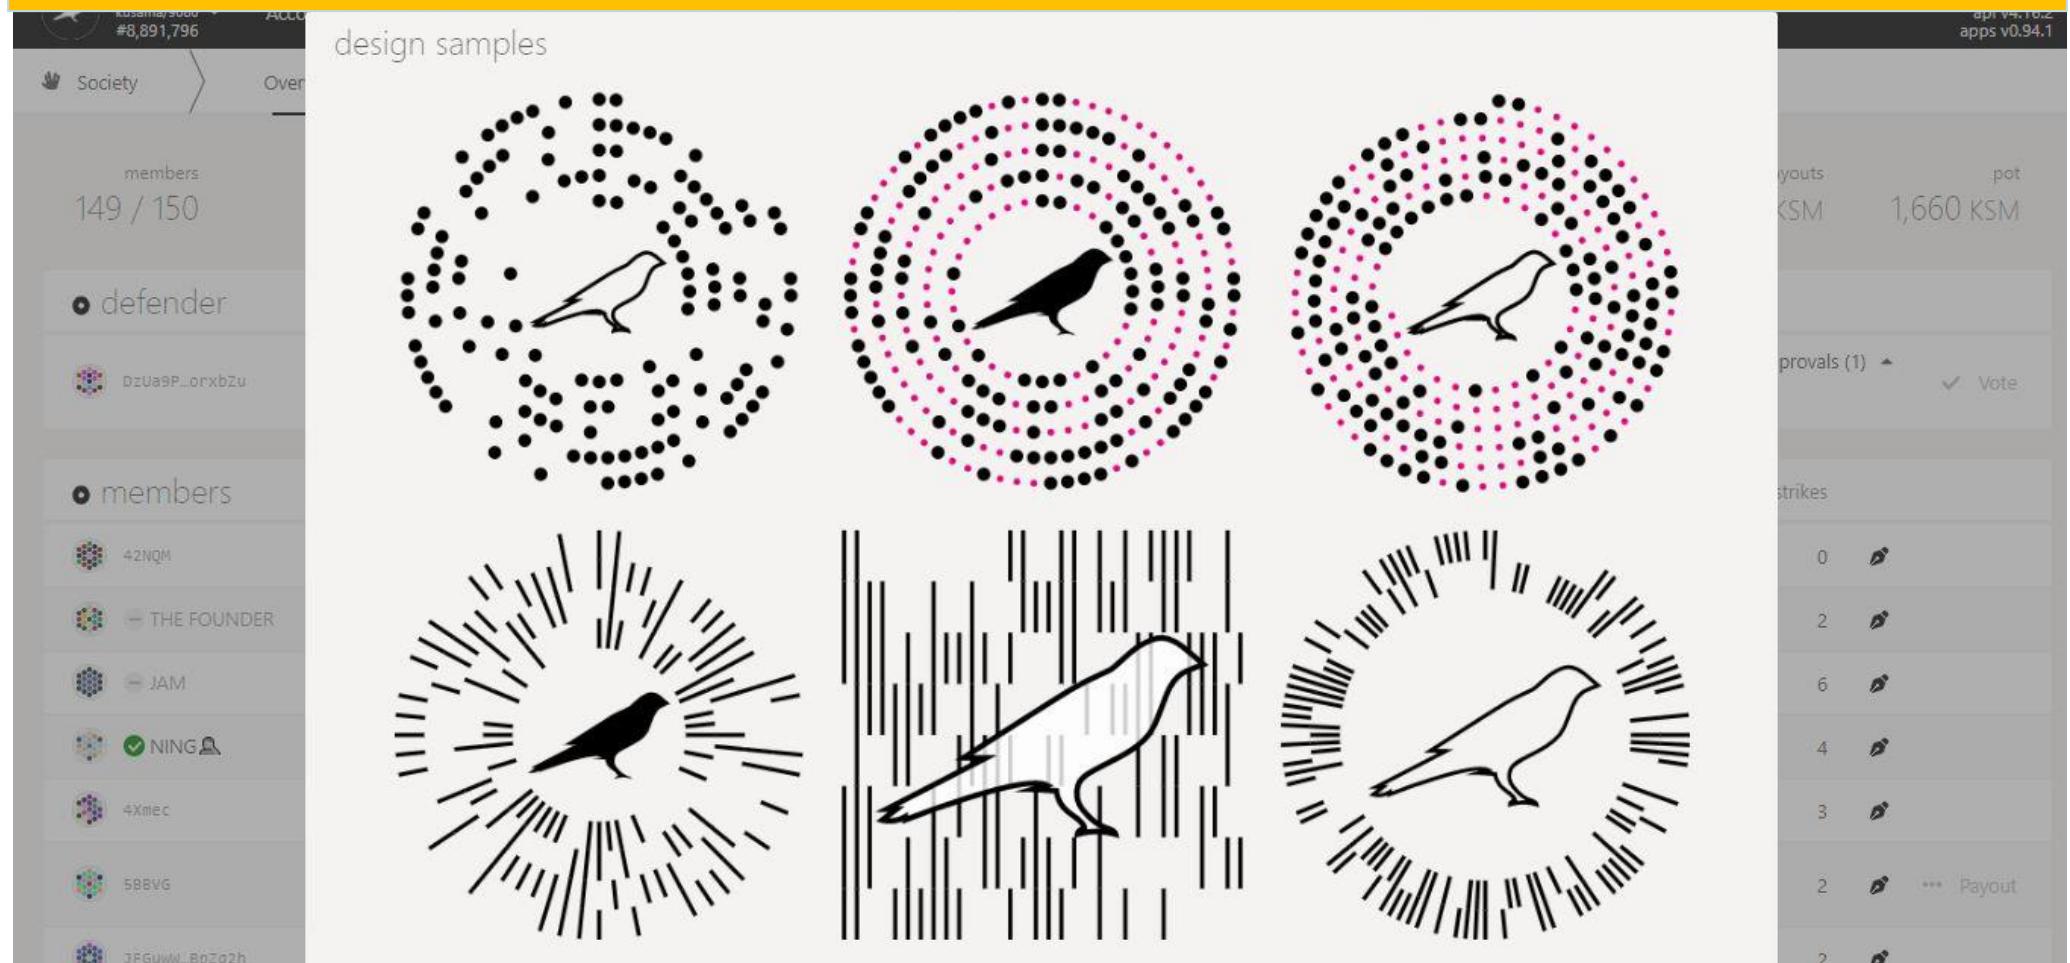

Version 3.0

The screenshot shows the Polkadot.js interface for the Kusama network. The top navigation bar includes tabs for Accounts, Network (selected), Governance, Developer, and Settings, along with links to GitHub and Wiki. The Network tab displays metrics for the Society: members (149 / 150), rotation (7 days, 21%), challenge (7 days, 21%), payouts (354.9123 KSM), and pot (1,660 KSM). Below these metrics, the 'defender' section lists a single member with an approval status. The main content area shows a table of Society members, each with their KSM balance, role (society head, founder, skeptic), and strike count. A yellow callout box highlights the 'Amount to be paid.' (0.9999 KSM) and 'Block number at which the payout will be processed.' (#8,872,320).

member	role	voted on	strikes
42NQM	society head		0
THE FOUNDER	founder		2
JAM	skeptic		6
NING	skeptic		4
4Xmec	skeptic		3
5BBVG	skeptic payout		2
JFGuW...BpZq2h	skeptic		

Amount to be paid.  
Block number at which the payout will be processed.

**Proof-of-Ink:** Society members must provide a proof of membership on an ongoing basis by showing a picture of their Kusama tattoo that meets strict requirements (i.e permanent, over 2.54 cm in size, with an ID of the Kusama network and the current Society head).

c) View Society candidates, candidacy status, and bid kinds.

1. Click on Candidates.

2. The list of successful bidders and queued bidders is now displayed!

3. Click on the dropdown arrow to see the list of Skeptics who have cast their vote.

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

The screenshot shows the Polkadot-JS Network interface with the 'Society' module selected. The top navigation bar includes links for 'Network', 'Governance', 'Developer', 'Settings', 'GitHub', and 'Wiki'. The right side of the header displays the Parity Polkadot version (v0.9.9), API version (v4.16.2), and Apps version (v0.94.1). Below the header, the 'Society' tab is active, with 'Overview' and 'Candidates' sub-tabs. A 'Submit bid' button is located in the top right corner of the main content area.

**candidates**

**Bid kinds in detail:**

To join the Society, users can either proceed independently or get an existing member to endorse their bid.

Bids represent the amounts that users would like to get as a payout from the Society pot. Successful bidders are promoted as Candidates. Note: The maximum number of successful bidders per rotation period is 10.

**Deposit:** When a user submits a bid by him/herself.

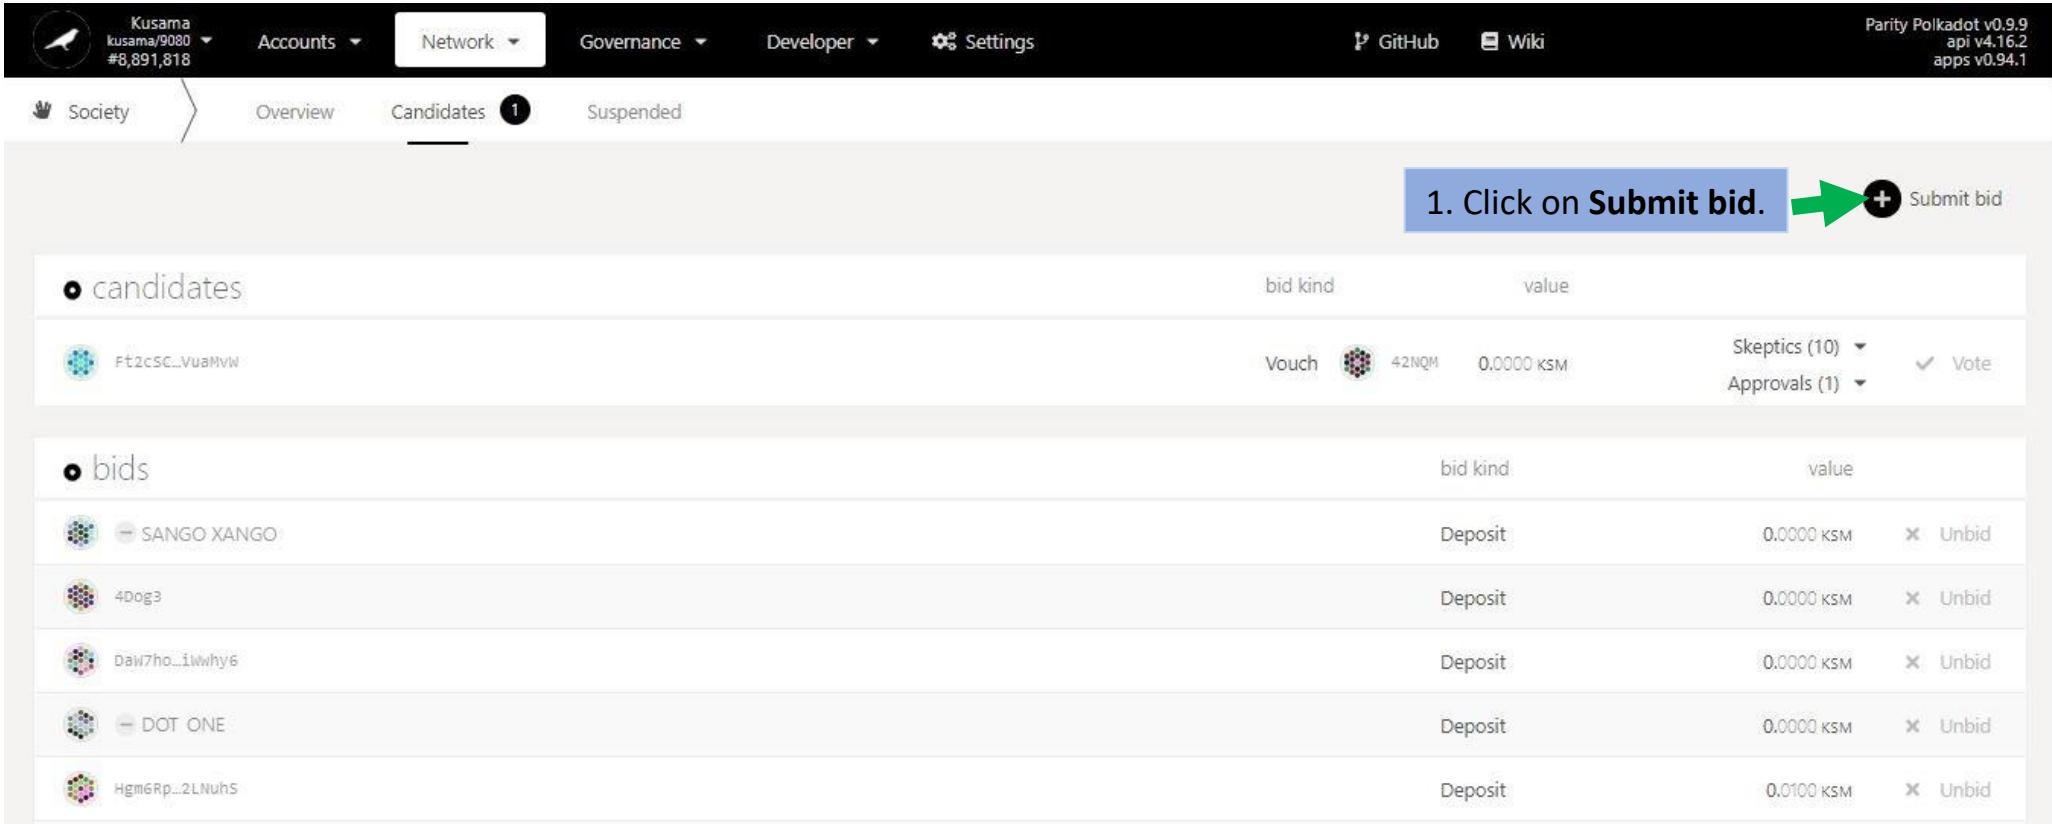

**Vouch:** When a member submits a bid on behalf of a user and earns a tip for it.

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

The screenshot shows the Polkadot-JS interface for managing Society candidates. The top navigation bar indicates the network is Kusama (kusama/9080) with account #8,891,909. The sidebar shows sections for Society, Overview, candidates, bids, and others.

**2. Follow on-screen instructions carefully.** This step is shown in the top right of the interface, where a green box highlights the "bid account" dropdown set to ANAELLE LTD@KSM and the "bid amount" input field containing 0.000034 KSM. A green arrow points to the "bid amount" field.

**3. Enter a KSM amount for your bid.** This step is shown in a blue box on the left side of the interface, corresponding to the bidding form.

**4. Click on Bid.** This step is shown in a blue box at the bottom right, with a green arrow pointing to the "Bid" button, which is highlighted with a green oval.

**5. Check the transaction fees.** This step is shown in a blue box in the middle right, with a green arrow pointing to the "queued" status indicator for the transaction. A yellow box labeled "Nature of the transaction." is also present.

**6. Click on Sign & submit to continue the procedure.** This step is shown in a blue box at the bottom right, with a green arrow pointing to the "Sign and Submit" button, which is highlighted with a green oval.

The screenshot shows the Polkadot-JS extension interface on a Kusama network. A yellow box on the left contains the text: "Summary of the transaction sent via the Polkadot-JS extension." An arrow points from this box to the transaction details window. Another arrow points from the "Sign the transaction" button to a callout below it. A green arrow points from the "Progress of the transaction." header to the right side of the screen.

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

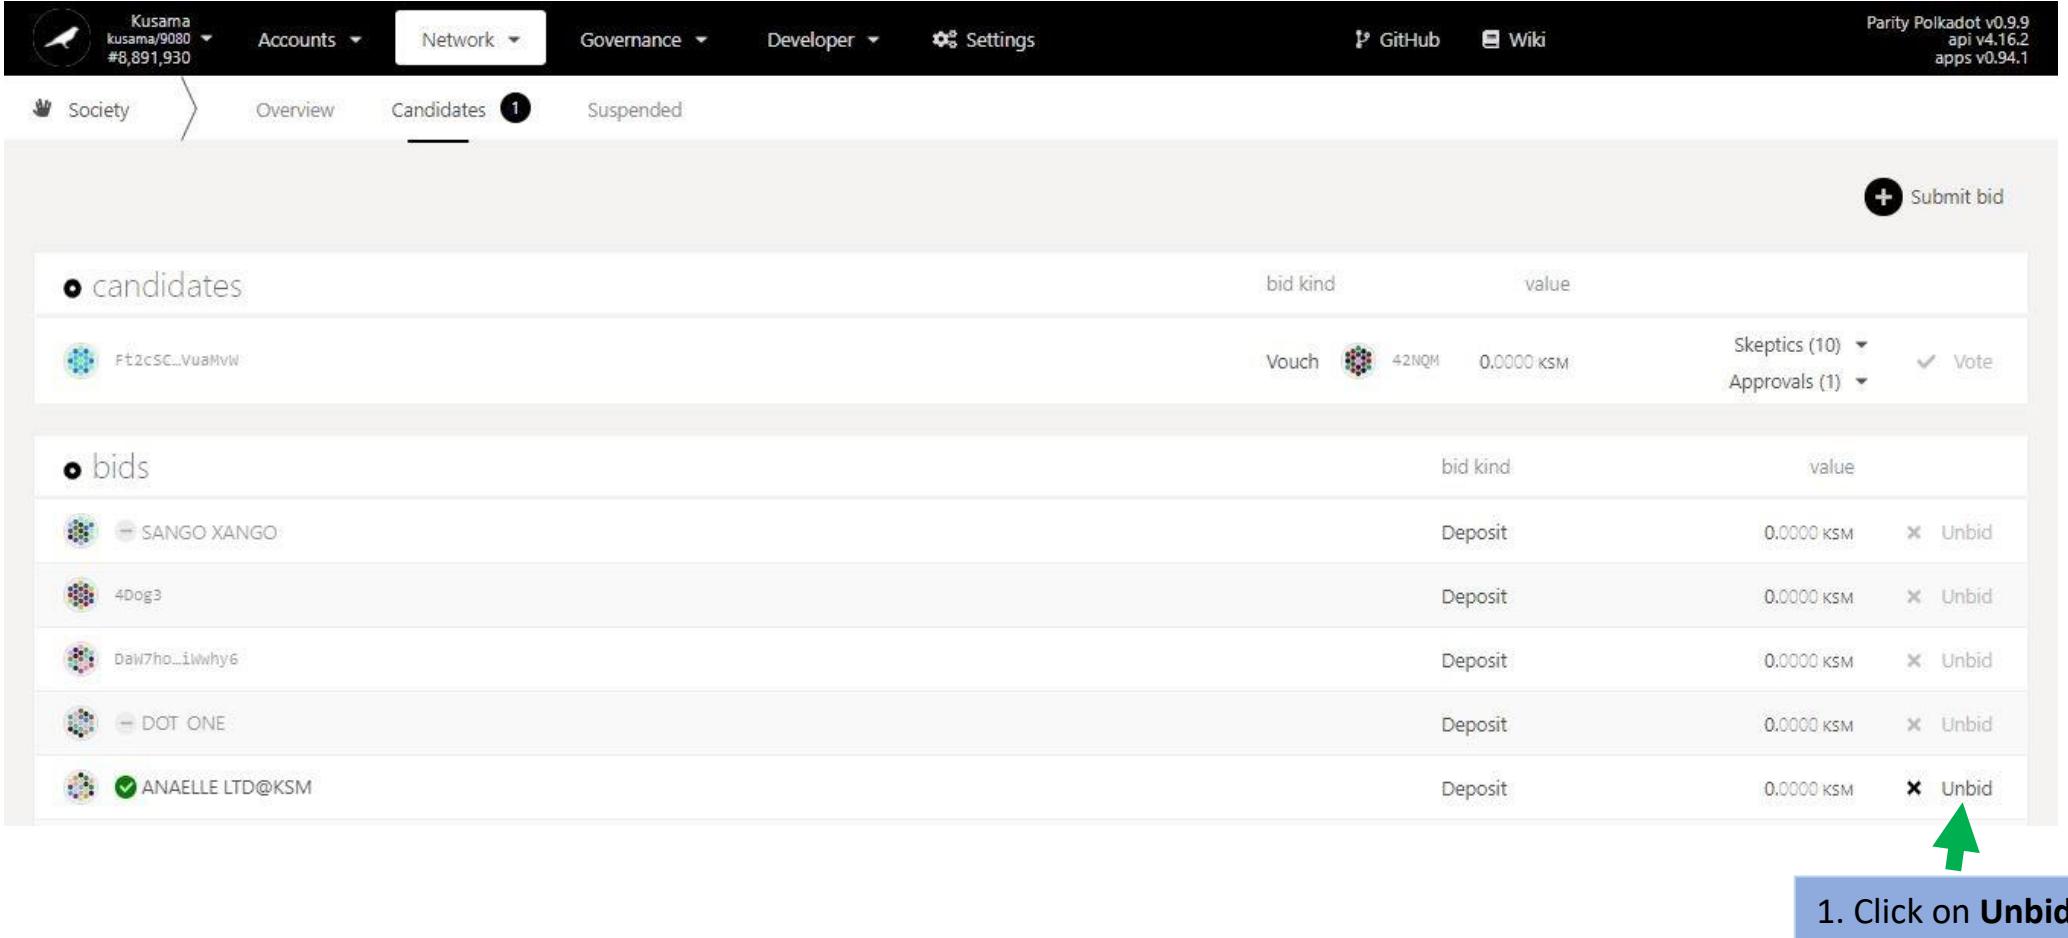

The screenshot shows the Polkadot.js Network interface. At the top, there's a navigation bar with links for Accounts, Network (selected), Governance, Developer, Settings, GitHub, and Wiki. On the left, there's a sidebar with a Society icon and tabs for Overview, Candidates (selected), and Suspended. A notification badge '1' is visible on the Candidates tab. In the top right corner, it says "Parity Polkadot v0.9.9 api v4.16.2 apps v0.94.1". Below the navigation, there are two sections: "candidates" and "bids". The "candidates" section shows a single entry for "Ft2cSC...VuamvN" with a Vouch bid kind, value 0.0000 KSM, and a "Vote" button. The "bids" section lists several entries: "SANGO XANGO", "4Dog3", "Daw7ho...iLwhy6", "DOT ONE", "ANAEILLE LTD@KSM" (which is highlighted with a green border and has a "9. Your bid is now in the queue!" message above it), and "Hgm6Rp...2LNuhS". Each bid entry includes a "Deposit" value and a "Unbid" button.

	bid kind	value	
Ft2cSC...VuamvN	Vouch	42NQM 0.0000 KSM	Skeptics (10) ▾ Approvals (1) ▾ <input checked="" type="button"/> Vote

	bid kind	value	
SANGO XANGO	Deposit	0.0000 KSM <input type="button"/> Unbid	
4Dog3	Deposit	0.0000 KSM <input type="button"/> Unbid	
Daw7ho...iLwhy6	Deposit	0.0000 KSM <input type="button"/> Unbid	
DOT ONE	Deposit	0.0000 KSM <input type="button"/> Unbid	
ANAEILLE LTD@KSM	Deposit	0.0000 KSM <input type="button"/> Unbid	
Hgm6Rp...2LNuhS	Deposit	0.0100 KSM <input type="button"/> Unbid	

**9. Your bid is now in the queue!**

## e) Withdraw a candidacy bid.

The screenshot shows the Polkadot.js Network interface with the Candidates tab selected. There is one candidacy bid listed:

		bid kind	value	
	Ft2cSC...VuamVw	Vouch	42NQM 0.0000 KSM	Skeptics (10)  ✓ Vote Approvals (1)

Below the candidates section is a bids section listing several entries:

		bid kind	value	
	SANGO XANGO	Deposit	0.0000 KSM	
	4Dog3	Deposit	0.0000 KSM	
	Daw7ho_iWwhy6	Deposit	0.0000 KSM	
	DOT ONE	Deposit	0.0000 KSM	
	ANAEILLE LTD@KSM	Deposit	0.0000 KSM	

A green arrow points to the 'Unbid' button next to the entry for 'ANAEILLE LTD@KSM'. A blue box at the bottom right contains the instruction '1. Click on Unbid.'

1. Click on Unbid.

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

The screenshot shows the Polkadot-JS UI interface for sending a transaction. The top navigation bar shows 'Kusama' and account details. The left sidebar has sections for 'candidates', 'bids', and '4D0g3'. The main area is titled 'authorize transaction' and shows the transaction details: 'Sending transaction society.unbid(pos)'. It explains that a bidder can remove their bid for entry into society, and provides a note about fees. A green box highlights the fee information: 'Fees of 40.6716 micro KSM will be applied to the submission'. Below this, there's a section for 'sending from my account' with the account 'ANAELE LTD@KSM' selected. A toggle switch is set to 'Do not include a tip for the block author'. A call hash '0xb2a7d48b3e1f6b0e5f9548b57572910daa4e49c624676a0a4368bdb33b3f5029' is shown with a copy icon. At the bottom, a 'Sign and Submit' button is highlighted with a green oval and a green arrow pointing to it. The status bar at the top right shows 'society.unbid queued'.

authorize transaction

Sending transaction society.unbid(pos)

A bidder can remove their bid for entry into society. By doing so, they will have their candidate deposit returned or they will unvouch their voucher.

Fees of 40.6716 micro KSM will be applied to the submission

2. Check the transaction fees.

## GUIDE TO POLKADOT-JS – PART II: Network

Version 3.0

The screenshot shows the Polkadot.js Network interface. At the top, there's a navigation bar with links for Accounts, Network (selected), Governance, Developer, Settings, GitHub, and Wiki. On the left, there's a sidebar with Society, Overview, Candidates (1 selected), and Suspended. On the right, it shows Parity Polkadot v0.9.9, api v4.16.2, and apps v0.94.1.

The main content area has two sections:

- Candidates:** Shows one candidate: Ft2cSC...VuamvW. It has a Vouch bid kind with a value of 0.0000 KSM. There are buttons for Skeptics (10) and Approvals (1).
- bids:** Shows five bids:
  - SANGO XANGO: Deposit 0.0000 KSM, Unbid button
  - 4Dog3: Deposit 0.0000 KSM, Unbid button
  - Daw7ho...ilwhy6: Deposit 0.0000 KSM, Unbid button
  - DOT ONE: Deposit 0.0000 KSM, Unbid button
  - Hgm6Rp...2LNuhs: Deposit 0.0100 KSM, Unbid button

A prominent blue banner at the bottom of the bids section says "5. Your bid has been removed from the queue!"

## f) Submit a candidacy bid via vouch.

The screenshot shows the Polkadot.js interface for the Kusama network. The top navigation bar includes 'Accounts', 'Network' (set to 'Kusama'), 'Governance', 'Developer' (with a dropdown menu), 'Settings', 'GitHub', 'Wiki', and version information ('Parity Polkadot v0.9.9', 'api v4.16.2', 'apps v0.94.1'). Below the navigation is a sidebar with 'Society' and tabs for 'Overview', 'Candidates' (1), and 'Suspended'. A large blue callout box labeled '1. Mouse-over Developer.' points to the 'Developer' button. Another blue callout box labeled '2. Select Extrinsic from the dropdown menu.' points to the 'Extrinsic' option in the developer dropdown menu. The main content area shows a table for 'candidates' with one entry: 'Ft2cSC...VuamvW' with a 'Vouch' bid kind, value '0.0000 ksm', and a 'Skeptics (10)' dropdown. Below this is a table for 'bids' with entries for 'SANGO XANGO' and '4Dog3', both with 'Deposit' bid kinds and '0.0000 ksm' values, each with a 'Unbid' link.

1. Mouse-over Developer.

2. Select Extrinsic from the dropdown menu.

	bid kind	value	
Ft2cSC...VuamvW	Vouch	42NQM 0.0000 ksm	Skeptics (10) <input checked="" type="checkbox"/> Vote Approvals (1) <input type="checkbox"/>

	bid kind	value	
SANGO XANGO	Deposit	0.0000 ksm	<input type="checkbox"/> Unbid
4Dog3	Deposit	0.0000 ksm	<input type="checkbox"/> Unbid

The screenshot shows the Polkadot.js extension interface for Kusama. The top navigation bar includes 'Accounts', 'Network', 'Governance', 'Developer' (selected), 'Settings', 'GitHub', and 'Wiki'. The status bar indicates 'Parity Polkadot v0.9.9', 'api v4.16.2', and 'apps v0.94.1'. The user account is 'kusama/9080 #8,892,196'. The main area shows a 'Submission' tab selected under 'Extrinsics'. A blue box labeled '3. Select the account of the voucher.' points to the 'using the selected account' dropdown, which has 'ANAELE LTD@KSM' selected. Another blue box labeled '4. Navigate the dropdown menus to select the correct method.' points to the 'vouch(who, value, tip)' dropdown menu. A third blue box labeled '5. Select the account of the bidder.' points to the 'who: AccountId' dropdown, which has 'TOMIESTTOM' selected. A fourth blue box labeled '6. Enter a KSM amount for the bid and the tip.' points to the 'value: BalanceOf' and 'tip: BalanceOf' input fields, both set to '0.00001'. Below these fields is an 'encoded call data' section with a hex string. At the bottom right are two buttons: 'Submit Unsigned' and 'Submit Transaction' (circled in green). A fifth blue box labeled '7. Click on Submit Transaction.' points to the 'Submit Transaction' button.

3. Select the account of the voucher.

4. Navigate the dropdown menus to select the correct method.

5. Select the account of the bidder.

6. Enter a KSM amount for the bid and the tip.

7. Click on Submit Transaction.

Nature of the transaction.

The screenshot shows the Polkadot-JS extension interface for Kusama. The top bar displays account information: Kusama, kusama/9080, Account #8,892,205. The main window title is "authorize transaction". The transaction details are: "Sending transaction society.vouch(who, value, tip)". Below this, a note says "As a member, vouch for someone to join society by placing a bid on their behalf." A green box highlights the fee information: "Fees of 60.6714 micro KSM will be applied to the submission". To the right, a blue box contains the instruction "8. Check the transaction fees." Further right, a teal status bar shows "society.vouch queued" with a green arrow pointing down to it. The bottom right of the main window shows the "Sign and Submit" button, which is circled in green. The status bar also shows "free balance: 4.1512 KSM" and "KSM".

9. Click on **Sign & submit** to continue the procedure.

The screenshot shows the Polkadot-JS extension interface for the Kusama network. A yellow box on the left highlights the 'Summary of the transaction sent via the Polkadot-JS extension.' A green arrow points from this summary to the transaction details in the center. Another green arrow points from the 'Sign the transaction' button at the bottom to the 'Progress of the transaction.' bar on the right.

10. Click on **Sign the transaction** to complete the procedure.

## g) View suspended members and suspended candidates.

The screenshot shows two instances of the Polkadot.js Network interface. In both instances, the 'Society' tab is selected. The top instance has the 'Suspended' tab selected, indicated by a green arrow pointing to it. A blue box contains the text '1. Click on Suspended.' Below this, another blue box contains the text '2. The list suspended members and candidates is now displayed!'. A yellow callout box highlights the 'Suspension in detail:' section, which defines 'Suspended member' and 'Suspended candidate' with their respective notes. The bottom instance shows the 'Candidates' tab selected. Both instances show network statistics like rotation and challenge times, and payout amounts.

1. Click on **Suspended**.

2. The list suspended members and candidates is now displayed!

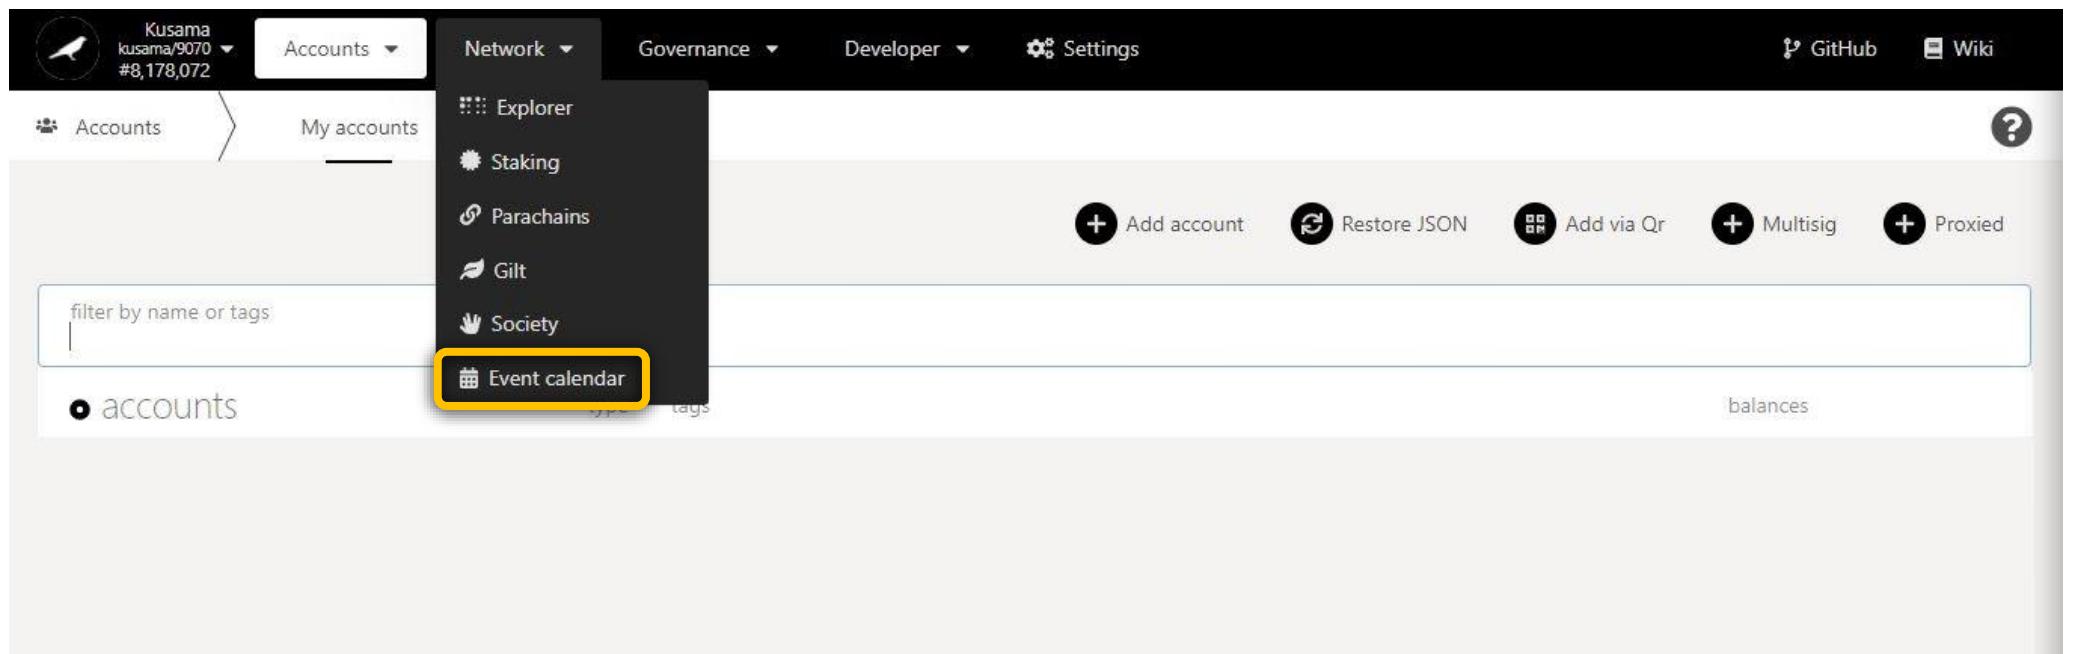

**Suspension in detail:**

**Suspended member:** A member that failed the Proof-of-Ink challenge or collected too many strikes. Note: Suspended members cannot claim their payouts and must be re-entered into the Society by the Founder to avoid losing all their future payouts.

**Suspended candidate:** A candidate that failed the vote. Note: Suspended candidates can be accepted as Society members, re-entered into the bid queue, or rejected by the Founder.
